

Savitribai Phule Pune University, Pune

(Formerly, University of Pune)

Under Graduate Degree Program in Botany (B.Sc. Botany)

(Faculty of Science & Technology)

Revised Syllabi as per National Education Policy (2020) for

F.Y.B.Sc. Botany (Semester-I and II)

(For Colleges Affiliated to Savitribai Phule Pune University, Pune)

To be implemented from

Academic Year 2024-2025

Framed by

BOARD OF STUDIES IN BOTANY

Savitribai Phule Pune University,

Ganeshkhind, Pune -07.

(Dr. Mahesh N. Khavde)
Chairman - Bos Botany

AIMS AND OBJECTIVES

- To develop employability oriented diversified course content.
- To introduce skill oriented specialized education by introducing in-depth learning concepts.
- To expose students to the process of systematic academic inquiry and exhibiting courtesy to the vast universe of basic and applied knowledge of plants.

PROGRAM OUTCOMES (POS)

According to NEP-2020 criteria, the Under Graduate degree in Botany (F.Y.B.Sc. Botany) program at Savitribai Phule Pune University, Pune's associated colleges, is structured to provide students with advanced field-related knowledge and essential fundamentals. Through a unique combination of required major core courses with in-depth exposure to multidisciplinary minor, elective, and vocational skill courses, among other courses, students will be trained and acquire the fundamental and advanced knowledge essential to the plant sciences industries.

With the knowledge gained in the field of plant sciences, this upgraded curriculum will develop educated, outcome-oriented candidates who are nurtured through discovery and learning, equipped with practice and skills to deal with practical problems, and competent with recent pedagogical trends in education, including E-learning, flipped class, hybrid learning, and experiential learning. These candidates will become responsible citizens, transforming the nation to lead the world in the future.

After successful completion of the Under Graduate (UG) Degree program, the students would be able to:

PO1: Attain thoughtful proficiency in the field of plant sciences.

PO2: Acquire the ability to perform in multidisciplinary domains.

PO3: Attain the ability to exercise intelligence of scientific knowledge for investigation and innovation and nourishment of the world.

PO4: Learn value based ethical practices and principles committed to professional ethics.

PO5: Incorporate 21st century skill oriented self-directed and life-long learning.

PO6: Obtain ability to inculcate the knowledge of plant science in diverse contexts with global perspective.

PO7: Attain maturity to harness the destiny and responds to one's calling.

PROGRAM SPECIFIC OUTCOMES (PSOs)

PSO1: Recall the diversity, classification, evolution and developmental changes among the plants with reference to lower and higher plant groups and create a knowledge base

in understanding the basis of plant diversity, economic values and taxonomy of plants.

PS02: Understand the advanced concepts of Genetics, Cell biology and Plant Biotechnology of plants and its implementation for the improvement of crop productivity.

PS03: Acquire and utilize the skills of post-harvest, flower design, fruit processing and dehydration techniques, organic farming and various plant processing technologies for developing the economy to the growing world.

PS04: Know about the importance of Medicinal plants and its useful parts, economically important plants in our daily life and also about the traditional medicines and herbs, and its relevance in modern times.

PS05: Inculcate the methodology followed in plant breeding, pharmacognosy, herbal drug technology, plant protection, propagation and improvement.

PS06: Adapt methods of scientific research in plant improvement program and create entrepreneurships, employment to the society.

PS07: Analyze the impact of scientific and technological advances on the environment and society and understand the importance of biodiversity conservation, green cover development, carbon sequestration and utilize the knowledge for sustainable development.

PS08: Explore the knowledge of biotic and abiotic stress tolerance, plant microbe interaction and Integrate pest management for making the revolution in the agriculture.

PS09: Enrich the ability of critical thinking, development of scientific attitude, handling of problems and generating solutions, improve practical skills, and enhance communication skill.

PS010: Apply the fruitful knowledge of plant sciences and plant resources for the sustainable development, betterment of society and environment by recognizing the ethical values.

PS011: Become competent enough in various analytical and 21st century technical skills related to plant sciences for their exploration.

PS012: Exhibit the potential to effectively accomplish tasks independently and as a member or leader in diverse teams, and in multidisciplinary settings.

PS013: Employ critical thinking based problem solving and practical skills pertaining to botanical techniques and computational knowledge and apply strategies for environmental conservation.

PS014: Demonstrate knowledge and scientific understanding to identify research problems, design experiments, use appropriate methodologies, analyze and interpret

data and provide solutions. Exhibit organizational skills and the ability to manage time and resources.

1. Title of the Course: B.Sc. Botany (03 years) / B.Sc. with Honours in Botany (04 years)

Syllabus revised as per National Education Policy (NEP) 2020 for the Colleges Affiliated to Savitribai Phule Pune University, Pune

2. Faculty - Science and Technology

3. To be implemented -For F.Y.B.Sc. (Semester I and Semester II), from August 2024.

4. Preamble -

Plants are the sole true foundation for all scientific disciplines since they create all kinds of ecosystems and are necessary for all other life forms on Earth to survive. Through both basic and applied research, the study of botany has a significant potential to assist the nation in achieving its sustainable goals. The world's overpopulation is having a concerning effect on the development and productivity of food (particularly plants), in addition to the ever-increasing challenges of environmental contamination brought on by unfavourable climatic changes, global warming, and natural disasters.

Botany is the only supreme foundation of all sciences, because plants, as producers of all kinds of ecosystems, play a critical role in the survival and existence of all other living things on the planet. Botany has tremendous potential for achieving the nation's long-term goals by utilizing it at both the basic and applied levels. In the current scenario, the world's overpopulation, combined with the day-by-day increasing problems of environmental pollution caused by adverse climatic changes, global warming, and natural calamities, is severely affecting the growth, development, and productivity of produce (particularly plants) to alarming levels.

Higher education in plant sciences should be encouraged for students with backgrounds in the life sciences, with an emphasis on applying the most recent data, expertise, and abilities from both basic and applied branches to develop solutions for sustainable development. In light of this curriculum has been designed to equip students with the knowledge and skills they will need to handle problems pertaining to the needs and worries of both the environment and the human population. In order to accomplish these goals, every effort is made to guarantee high standards of education by implementing numerous strategies to enhance the teaching-learning process, assessment and evaluation methods, and making sure that students are developed holistically in line with the goals and standards of NEP 2020.

The thoughtfully crafted F.Y.B.Sc. Botany curriculum combines a focus on subjects linked to advanced agriculture, the plant-based industry, and pharmaceutical companies with a deep comprehension of the subject's fundamental concepts. This will inspire and attract life science students to seek M.Sc. and Ph.D. degrees in botany in order to become prosperous entrepreneurs, proficient workers, or sophisticated farmers who can address social and environmental issues as a part of sustainable development.

The National Education Policy (NEP-2020), which is being implemented by the Ministry of Higher Education, the Government of India, and the University Grants Commission (UGC), offers opportunities for developing 21st century advanced skills based on the Indian knowledge system through research internships with renowned and esteemed faculty and researchers at their own or other HEIs / research institutes. Additionally, it acknowledges, pinpoints, and nurtures each student's distinct talents in order to support their overall growth and strengthen the country. This will empower Indian youngsters in the field of plant sciences globally and assist the country establish a solid foundation on the global market. Our nation boasts the highest percentage of young people, who, after receiving a top-notch education, have the potential to govern the world in the years to come.

In order to address problems pertaining to plant sciences, such as biodiversity conservation, soil health, plant nutrition, plant wealth and plant-based resource management, interactions between plants and microorganisms, plant pathogens and diseases, and carbon sequestration, the B.Sc. Botany curriculum offers a thorough theoretical and practical knowledge base. In the exploration of plant sciences, students will be able to stand independently and with confidence.

Program Duration and Exit Options

The UG Program lasts for four years or eight semesters.

Student may leave the program after the third year if, he/she would like to receive a three-year undergraduate degree.

If the student decides to withdraw after the first or second year, he/she will receive a UG Certificate or UG Diploma, depending on how many credits he/she is able to complete. Re-entering within three years to finish the degree program is allowed for students who leave with a UG certificate or UG diploma. A student must earn a minimum of 18 credits and a maximum of 26 credits each semester. It is recommended, nevertheless, that student should opt 22 credits per semester. This clause aims to give student the comfort of a flexible semester-based course load. However, Table 1 lists the minimum number of credits

required to be earned in order to be awarded an Undergraduate Certificate/Undergraduate Diploma/Bachelor Degree/Bachelor's Degree with Honors in Botany.

Table1: Type of Awards and Stages of Exit

Sr. No.	Type of Award	Stage of Exit	Mandatory Credits
1.	Undergraduate Certificate in Botany	After successful completion of First year Semesters	44
2.	Undergraduate Diploma in Botany	After successful completion of Second year Semesters	88
3.	Bachelor of Science in Botany	After successful completion of Third year Semesters	132
4.	Bachelor of Science in Botany (Honours)	After successful completion of Fourth year Semesters	176

5. Eligibility Criteria -

The basic criteria for Under Graduate Degree (F.Y.B.Sc. Botany) admission will be 10+2 criteria with Biology, Physics, Chemistry, Mathematics, and Geography as Principal subjects OR MCVC OR Diploma courses related to Plant Sciences. Admissions will be given as per the selection procedure / policies adopted by the college keeping in accordance with the conditions laid down by the Savitribai Phule Pune University, Pune. Reservation and relaxation are as per the State Government rules.

6. Fee Structure – As per the norms of Savitribai Phule Pune University, Pune.

7. Duration of the Course

Certificate Course- 01 year (Completion of 02 Semesters)

Diploma Course- 02 years (Completion of 04 Semesters)

BSc Degree- 03 years (Completion of 06 Semesters)

BSc Degree with Honours- 04 years (Completion of 08 Semesters)

8. No. of semesters – Two semesters per year

9. Medium of instructions and teaching: English

10. Course Implementation criteria for Theory and Practical:

a. Each semester comprises of 15 weeks (12 weeks Actual Teaching + 3 weeks for Continuous Internal Evaluation).

b. One Credit of the Theory is equal to 15 clock hours (Teaching 1 hour per week for each credit, 12 hours Actual Teaching + 3 hours Continuous Internal Evaluation – Assignments, Tutorials, Practice, Problem solving sessions, Group discussion, Seminars and Unit Tests.

c. One Credit of Practical = 30 clock hours. (2 Contact hours per credit per week)

One Credit = 30 clock hours (24 hours' Actual Table work + 6 hours for journal competition, and Continuous Internal Evaluation of each practical).

d. Practical for each course comprises of 02 Credits = 60 clock hours. Therefore,

- Minimum 12 laboratory sessions of 04 clock hours must be conducted in one semester.
- In case of short practical, two practicals should be conducted in one session.
- Each practical of 04 clock hours in the laboratory should consist of: Table performance for concerned practical, careful observations, calculation, writing results and conclusion, and submission of practical in written form.
- Pre-laboratory reading and post laboratory assignments should be given on each practical as a part of continuous internal evaluation.

11. Examination Pattern (For each Semester): The examinations will be conducted semester wise for both Theory as well as Practical courses.

- **Theory Paper of 02 Credits -**
 - Internal Exam (15 M) + University Theory Exam (35 M) = Total 50 M
 - Duration: For Internal exam = 40 Min. and For University Exam = 02 hours.
- **Practical Paper of 2 Credits -**
 - Internal Exam (15 M) + University Practical Exam (35 M) = Total 50 M
 - Duration: For Internal exam = 40 Min. and For University Exam = More than 04 hours.

12. Award of Class/Grade: The class / grade for the courses of each semester will be followed as per the norms and conditions laid down by SPPU, Pune.

13. ATKT Rules: As per the norms given by SPPU, Pune.

14. Important Note:

a. There shall be at least a short tour/field visit/industrial visit (1-2 days) per year for all UG students. Tours are the part of curriculum and obligatory to each student, failing which they will not be considered eligible to appear for the practical examination. Under unavoidable circumstances, if the student fails to attend the tour, he/she have to produce justifiable evidence for not attending the tour. However, in lieu of tour the candidate will have to complete the work assigned by the Department.

c. The documents to be produced by each student at the time of practical examination (at the end of each Semester) are:

- Submission of practical records (Journals).
- Submission of a Tour / Visit report duly signed by the concerned practical In-charge and Head of the Department.
- Any submissions / assignments, etc. based on the practical course.

Question paper pattern for Theory (2 Credit courses)

A student will have to solve the question paper of 35 marks. The paper setter should set the paper on entire syllabus for total 61 marks, including optional questions. As the course is of 2 Credits (30 clock hour lectures), paper setter should allot 2.03 marks per lecture and accordingly, questions should be set for 30 lectures, 61 marks on entire syllabus.

Note: All questions are compulsory.

Time: 2 Hours

CREDIT FRAMEWORK FOR F.Y.B.Sc. BOTANY, SEMESTER – I and II (Level 4.5 / 100)

SEMESTER I			
COURSE DETAILS	COURSE CODE	COURSE TITLE	CREDITS
Subject 1 – (1T + 1P) x 2 C = 4 C	BOT-101-T	Basics of Plant Sciences	2 C
	BOT-102-P	Practical Based on BOT-101-T	2 C
Subject 2 – (1T + 1P) x 2 C = 4 C	Subject 2 -T	-----	2 C
	Subject 2 -P	-----	2 C
Subject 3 – (1T + 1P) x 2 C = 4 C	Subject 3 -T	-----	2 C
	Subject 3 -P	-----	2 C
Generic Elective (GE) / Open Elective (OE) - (1T = 2 C) (Any one from basket)	OE-101-BOT-T	Agro-tourism	2 C
	OE-102-BOT-T	Plants and Human Welfare	
	OE-103-BOT-T	Agriculture for Competitive Exams	
Skill Enhancement Courses (SEC) – (1T / 1P = 2 C) (Any one from basket)	SEC-101-BOT-P	Flower Design Techniques	2 C
	SEC-102-BOT-P	Post-Harvest Technology	
	SEC-103-BOT-P	Algal Technology	
Indian Knowledge Systems (IKS) – (1T = 2 C)	IKS-101-T	Generic	2 C
Ability Enhancement Course (AEC) – (1T = 2 C)	AEC-101-ENG-T	English	2 C
Value Education Courses (VEC) – (1T = 2 C)	VEC-101-ENV-T	Environmental Awareness	2 C
Total Credits (V1+V2+V3+V4+V5+V6)			22 C
SEMESTER – II			
Subject 1 – (1T + 1P) x 2 C = 4 C	BOT-151-T	Plant Morphology	2 C
	BOT-152-P	Practical Based on BOT-151-T	2 C
Subject 2 – (1T + 1P) x 2 C = 4 C	Subject 2 -T	-----	2 C
	Subject 2 -P	-----	2 C
Subject 3 – (1T + 1P) x 2 C = 4 C	Subject 3 -T	-----	2 C
	Subject 3 -P	-----	2 C
Generic Elective (GE) / Open Elective (OE) - (1P = 2 C) (Any one from basket)	OE-151-BOT-P	Fruit Processing and Flower Arrangement	2 C
	OE-152-BOT-P	Mushroom technology	
	OE-153-BOT-P	Vertical and Terrace Gardening	
Skill Enhancement Courses (SEC) – (1T / 1P = 2 C) (Any one from basket)	SEC-151-BOT-P	Plant Preservation Techniques	2 C
	SEC-152-BOT-P	Millets for Sustainable Agriculture Development	
	SEC-153-BOT-P	Plant Propagation Techniques	
Ability Enhancement Courses (AEC) – (1T = 2 C)	AEC-151-ENG-T	English	2 C
Value Education Courses (VEC) – (1T = 2 C)	VEC-151-ENV-T	Environmental Awareness	2 C
Co-curricular Courses (CC) – (1T = 2 C)	CC-151-T	Any one from basket	2 C
Total Credits (V1+V2+V3+V4+V5+V6)			22 C
Total Credits for FYBSC - Semester I (22 C) + Semester II (22 C)			44 C

Exit Option: Award of UG Certificate Course with 44 Credits and an additional 4 Credits core NSQF course / Internship OR Continue with Major and Minor.

Continue option: Student will select one subject among the subject 1, subject 2 and subject 3 as Major and another 2 as Minor and third subject will be dropped.

F. Y. B. Sc. Botany (Semester-I)
Course Code- BOT-101-T
Course Title: Basics of Plant Sciences

[No. of Credits: 2C]

[No. of Lectures: 30L]

Course Objectives:

1. To provide students with a comprehensive understanding of plant sciences, including its subfields, significance, and applications in various industries such as agriculture, pharmaceuticals, biofuels, and environmental sustainability.
2. To enable students to understand the concept of plant diversity, its importance, and the classification of plants into major groups like algae, fungi, bryophytes, pteridophytes, gymnosperms, and angiosperms.
3. To examine the economic relevance of various plant groups, such as algae, fungi, lichens, bryophytes, pteridophytes, gymnosperms, and angiosperms, and explore their uses in industries such as food, medicine, biofuels, and bioremediation.
4. To study the structure, classification, and reproductive patterns of different plant groups with examples, helping students gain a deeper understanding of plant biology.
5. To develop practical knowledge by exploring how plants contribute to diverse industries and environmental processes, and to prepare students for future career opportunities in plant sciences.

Course Outcomes:

1. By the end of the course, students will be able to understand and classify plants into major groups (algae, fungi, lichens, bryophytes, pteridophytes, gymnosperms, and angiosperms) based on their morphological and reproductive features.
2. Students will be able to identify and explain the economic significance of various plant groups, recognizing their applications in industries such as food, pharmaceuticals, biofuels, textiles, and environmental sustainability.
3. Students will gain the ability to describe the reproductive cycles and morphological characteristics of plants like algae, fungi, lichens, bryophytes, and others, with examples from groups such as *Nostoc*, *Agaricus*, *Riccia*, *Azolla*, *Cycas*, and others.
4. Students will understand the various applications of plant sciences in real-world scenarios such as environmental monitoring, bioremediation, medicine, and industrial processes like biofuel production, food processing, and landscaping.
5. By the conclusion of the course, students will be well-equipped to pursue careers or further education in fields related to plant biology, biotechnology, agriculture, environmental science, and various industries benefiting from plant-derived products and services.

F. Y. B. Sc. Botany (Semester-I)**Course Code- BOT-102-P****Course Title: Practical Based on BOT-101-T****[No. of Credits: 2C]****[No. of Lectures: 30L]****Course Objectives**

1. To provide students with a comprehensive understanding of the classification, morphology, and characteristics of algae, fungi, lichens, bryophytes, pteridophytes, gymnosperms, and angiosperms.
2. To study the ecological roles and economic importance of algae, fungi, lichens, bryophytes, pteridophytes, gymnosperms, and angiosperms in various industries including food, agriculture, pharmaceuticals, bioremediation, and environmental monitoring.
3. To equip students with practical skills to identify and classify plant and fungal species based on their morphology, anatomical structures, and taxonomic features.
4. To study the various industrial applications of these organisms, particularly in fields such as food, beverages, medicine, cosmetics, environmental management, and biofuels.
5. To enhance students' understanding of plant diversity and ecosystem dynamics through field visits and direct observation of plant species in natural habitats.

Course Outcomes:

1. Students will gain a strong foundation in plant and fungal taxonomy, being able to classify and describe various organisms, including algae, fungi, lichens, bryophytes, pteridophytes, gymnosperms, and angiosperms.
2. Students will be able to apply their knowledge of plant and fungal morphology to practical situations, including the identification of species and the exploration of their applications in industries like food, pharmaceuticals, and bioremediation.
3. Students will develop an understanding of the environmental and economic significance of different plant and fungal groups, recognizing their role in sustainability, bioremediation, agriculture, and carbon sequestration.
4. Students will gain hands-on experience in plant diversity and field research methods through visits to natural ecosystems, fostering observational skills and a deeper connection to the natural world.
5. Students will be able to describe and analyze the applications of plants and fungi in various industries, such as food processing, cosmetic manufacturing, environmental monitoring, and biofuel production, preparing them for careers in applied biology and biotechnology.

11	To study Classification and Morphology in <i>Cycas</i>	1P
12	To study applications of gymnosperms w.r.t Ornamental and landscaping; Medicine; Food, fodder and beverages; Environmental monitoring; Dyes; Bioremediation; Timber and wood	1P
13	To study comparative account of Dicotyledonous and Monocotyledonous plants with suitable examples.	1 P
14	To study economic importance of angiosperms w.r.t Ornamental and landscaping; Medicine; Food, fodder and beverages; Environmental monitoring; Dyes and pigments; Biofuels; Bio-plastics; Timber; Fiber	1P
15.	Visit to any nearby forest area to observe plant diversity	1P

Note: Any twelve practical's to be conducted from above mentioned list

**F.Y. B. Sc. Botany
Semester - I**

Generic Elective (GE) / Open Elective (OE) - (1T = 2C) (Any one from basket)	OE-101-BOT-T	Agro-tourism	2 C
	OE-102-BOT-T	Plants and Human Welfare	
	OE-103-BOT-T	Agriculture for Competitive Exams	

F. Y. B. Sc. Botany [Semester - I]
Course Category – Open Elective / Generic Elective (OE)
Course Code – OE-101-BOT-T
Course Title: Agro-Tourism

[No. of Credits: 2 C]

[No. of Lectures: 30 L]

Objectives:

1. Define agro-tourism and explain its significance in the context of sustainable tourism and rural development.
2. Study various agro-tourism models and best practices from around the world, including farm stays, farm-to-table experiences, and agri-tourism festivals.
3. Learn how to plan, develop, and manage agro-tourism businesses, including marketing strategies, customer service, and financial management.
4. Understand the role of agro-tourism in promoting sustainable agriculture practices, conservation of natural resources, and preservation of rural heritage.
5. Explore strategies for engaging and collaborating with local communities, farmers, and stakeholders to create authentic and meaningful agro-tourism experiences.

Outcomes:

1. Develop a comprehensive understanding of the concepts, principles, and practices of agro-tourism, including its history, development, and global trends.
2. Gain knowledge of sustainable agricultural practices and their importance in the context of agro-tourism, including organic farming, biodiversity conservation, and soil health management.
3. Acquire skills in planning, developing, and managing agro-tourism businesses, including business planning, marketing strategies, and customer relationship management.
4. Understand the importance of cultural and community engagement in agro-tourism, including the preservation of local traditions, heritage, and culinary practices.
5. Appreciate the role of agro-tourism in promoting environmental conservation, sustainable tourism practices, and responsible travel behavior.

F. Y. B. Sc. Botany [Semester - I]
Course Category – Open Elective / Generic Elective (OE)
Course Code – OE-101-BOT-T
Course Title: Agro-Tourism

[No. of Credits: 2 C]

[No. of Lectures: 30 L]

Sr. No.	Topic Details	No. of Lectures
	Credit I	15
1	Introduction to Agro-tourism 1.1. Definition, nature and scope of agro-tourism. 1.2. Historical background and evolution of Agro-Tourism 1.3. Needs and opportunities of agro-tourism. 1.4. Importance of agro-tourism in rural development.	03
2	Types of Agro-Tourism Activities 2.1. Types of agro-tourism activities – Farm tours and visits; farm stays and rural accommodations; agricultural festivals and events. 2.2. Concept of food and agriculture tourism.	03
3	Important Factors related to Agro-Tourism 3.1. Location for agro-tourism center. 3.2. Geographical factors- relief, climate, drainage pattern, soil. 3.3. Socio-economic factors- Capital, transportation facilities, market, landholding of farmers, tradition, cropping pattern.	05
4	Concerns of Agro-Tourism Centers 4.1. Criteria to start Agro-Tourism centers - Infrastructure Facilities, livestock, Recreation facilities, Other Miscellaneous. 4.2. Benefits of Agro-Tourism Centers. 4.3. Challenges of the Agro-Tourism centers.	04
	Credit II	15
5	Activities in Agro-Tourism centers 5.1. Animal Feeding, Guided field visits and tour, Watching domestic animals, seasonal crop festival. 5.2. Rural Festival/Jatra, Marketing of Farmer's produce (local /organic products), Milking the Cow and Buffalos, Religious Temple visits. 5.3. Swimming at well, ponds or river, fishing, Local site seeing. 5.4. Rural/folk games, dance, music etc. - Bullock cart, Bicycle, Tractor rides. <i>Vittidandu, Surparambhya, Kabaddi, Langadi, Kho-Kho, Bullock ploughing, Lagore & Gallori.</i> 5.5. Adventure activities- mountaineering, trekking, river crossing, cycling etc.	05
6	Agro-Tourism policies 6.1. Agro-Tourism policies in Maharashtra state. 6.2. Maharashtra Krishi Paryatan Vistar Yojana- MKPVY 6.3. Introduction and the concept. 6.4. Guidelines for approval and Guidelines of agro- tourism. 6.5. Application form for registration. 6.6. Checklist of facilities for approval. 6.7. Declaration by the farmer. 6.8. Undertaking by the farmer. 6.9. Performa for police verification.	07

7	Tourism Marketing strategy 7.1. Use of Social Media, Print Media, Attractive booking policies (for group/company/corporate etc.) 7.2. Website/Apps development for online booking and marketing.	03

F. Y. B. Sc. Botany [Semester - I]
Course Category – Open Elective (OE) / Generic Elective (GE)
Course Code – OE-102-BOT-T

Course Title: Plants and Human Welfare

[No. of Credits: 2 C]

[No. of Lectures: 30 L]

Objectives:

1. Explore the diverse range of plant-based resources that contribute to human welfare, including food, medicine, fuel, and construction materials.
2. Study the medicinal properties of plants and their applications in traditional and modern medicine, including the development of pharmaceuticals and herbal remedies.
3. Learn about sustainable practices for the cultivation, harvesting, and utilization of plant resources to ensure their long-term availability and ecological conservation.
4. Understand the role of plants in providing essential nutrients and promoting food security, including the cultivation of nutritious crops and traditional food systems.
5. Explore the environmental benefits of plants, such as carbon sequestration and soil conservation, as well as their economic contributions through agriculture, forestry, and horticulture.

Outcomes:

1. Develop a comprehensive understanding of the diversity of plant species and their utility in various aspects of human life, including food, medicine, shelter, and clothing.
2. Gain knowledge about medicinal plants, their active compounds, and their therapeutic uses in traditional and modern medicine.
3. Acquire awareness of sustainable practices in plant resource management, including conservation, cultivation, and utilization, to ensure long-term benefits for both humans and the environment.
4. Appreciate the significance of traditional knowledge systems related to plants and their role in preserving cultural heritage and biodiversity.
5. Develop critical thinking and problem-solving skills to evaluate the ethical, social, and environmental implications of plant use and propose sustainable solutions.

Sr. No.	Topic Details	No. of Lectures
	Credit I	15
1	Introduction 1.1. Origin of Cultivated Plants- Concept of Centers of Origin. 1.2. Domestication of plants and origin of agriculture. 1.3. Major and Minor food yielding Crops – Cereals, Pulses, Oil Seeds, Vegetables and Fibers.	04
2	Cereals and Pulses 2.1. Introduction and definition. 2.2. Cereals and Millets - Uses and byproducts of Wheat, Rice, Maize, Jowar, Bajara and Nachani. 2.3. Non-cereals - Uses and byproducts of Potato, Tapioca and Arrowroot. 2.4. Pulses - Uses and byproducts of Bengal gram, Pigeon Pea, Moong bean, Udid, Soybean, etc. 2.5. Importance of cereals, millets and pulses in human diet.	06
3	Oils and Fats 3.1. Introduction 3.2. Uses of edible oil yielding plants - Groundnut, Safflower, Mustard, Sesame, Coconut, Sunflower, Soybean, Rice-bran. 3.3. Traditional Methods of oil extraction and its health benefits 3.4. Non edible oil yielding plants- Neem oil, Karanj oil, Castor oil	05
	Credit II	15
3	Vegetables and Fruits 3.1. Introduction 3.2. Vegetables - Classification (as per parts used), Uses, processed byproducts of vegetables. 3.3. Fruits - Uses, processed byproducts of fruits – Mango, Grapes, Banana, Cashew Nut, Custard apple, Papaya, Guava, Lemon, Orange, etc. 3.4. Scope and importance of processed vegetables and fruits.	05
4	Spices and Condiments 4.1. Introduction, difference between spices and condiments 4.2. Importance of spices and condiments in diet - Turmeric, Ginger, Red Chilli, Coriander, Curry leaves, Clove, Saffron, Cardamom, Nutmeg, Cinnamon, Black pepper, Mustard, etc.	05
5	Beverages 5.1. Definition, types (alcoholic and non-alcoholic) 5.2. Processing of beverages – Wine production (Banana and Grapes), Tea Production and coffee production	05

F. Y. B. Sc. Botany [Semester - I]**Course Category – Open Elective (OE) / Generic Elective (GE)****Course Code – OE-103-BOT-T****Course Title: Agriculture for Competitive Exam****[No. of Credits: 2 C]****[No. of Lectures: 30 L]****Objectives:**

1. Provide a thorough coverage of important agricultural topics relevant to competitive exams, including agronomy, horticulture, plant breeding, soil science, and agricultural economics.
2. Provide high-quality study material, resources, and practice questions to help students prepare effectively for competitive exams.
3. Focus on building a strong foundation in key agricultural concepts, principles, and theories to help students understand and solve complex problems.
4. Conduct regular practice sessions and mock tests to help students improve their time management, accuracy, and confidence in answering exam questions.
5. Provide updates on current affairs, new developments, and technologies in agriculture to ensure students are aware of the latest trends and issues in the field.

Outcomes:

1. Develop a comprehensive understanding of key agricultural concepts, theories, and practices relevant to competitive exams.
2. Develop the ability to analyse and solve complex agricultural problems using critical thinking and problem-solving skills.
3. Improve time management skills to effectively answer exam questions within the allotted time frame.
4. Develop effective test-taking strategies to improve performance in competitive exams.
5. Build confidence in tackling questions related to agriculture, agronomy, horticulture, and other related fields in competitive exams.

Course Category – Skill Enhancement Course (SEC)
Course Code – SEC-101-BOT-P

Course Title: Flower Design Techniques

[No. of Credits: 2 C]

[No. of Lectures: 60 L]

Objectives:

1. Learn the basic principles and techniques of floral design, including line, form, balance, and colour harmony.
2. Develop advanced skills in creating various floral arrangements, such as bouquets, centrepieces, wreaths, and corsages, using different types of flowers and foliage.
3. Understand the proper care and handling of flowers, including selection, conditioning, and storage, to ensure longevity and freshness in arrangements.
4. Explore creative concepts and trends in floral design, such as contemporary styles, themed arrangements, and use of unconventional materials.
5. Practice professional presentation skills, including packaging, labelling, and displaying floral arrangements, for various occasions and settings.

Outcomes:

1. Develop proficiency in creating various basic floral arrangements, including hand-tied bouquets, vase arrangements, and table centrepieces, using proper techniques and principles of design.
2. Acquire advanced skills in creating complex floral designs, such as cascading bouquets, floral arches, and large-scale installations, demonstrating creativity and attention to detail.
3. Gain knowledge of different floral design styles, such as traditional, contemporary, and seasonal, and stay updated with current trends in the floral industry.
4. Understand the principles of flower selection, care, and handling, including proper conditioning, storage, and use of floral foam and other design tools.
5. Develop the ability to create customized floral designs tailored to specific occasions, themes, and client preferences, demonstrating creativity and versatility in design.

F. Y. B. Sc. Botany [Semester - I]
Course Category – Skill Enhancement Course (SEC)
Course Code – SEC-101-BOT-P

Course Title: Flower Design Techniques

[No. of Credits: 2 C]

[No. of Lectures: 60 L]

Sr. No.	Topic Details	Weightage
1	To study the structure of typical flower.	1P
2	To study the seasonal flowers and their characteristics.	1P
3	To study the types/styles of flower arrangements (e.g., Ikebana, European, Contemporary) with the help of ICT tools.	1P
4	To demonstrate the essential tools and materials used in flower arrangement.	1P
5	To study the selection of flowers and foliage types used for flower arrangement.	2P
6	Demonstration of drying and preservation of flowers.	1P
7	Preparation of traditional flower designs - garland, Gajra, Veni etc.	1P
8	Preparation of floral Rangoli.	1P
9	To study the different type of bouquets.	2P
10	To study the methods of vase life improvement of cut flowers.	1P
11	Visit to floriculture industry and study of floral business economics.	2P
12	To study the role of flower arrangement in event management.	1P

F. Y. B. Sc. Botany [Semester - I]
Course Category – Skill Enhancement Course (SEC)
Course Code – SEC-102-BOT-P

Course Title: Post-Harvest Technology

[No. of Credits: 2 C]

[No. of Lectures: 60 L]

Objectives:

1. Understand the physiological and biochemical changes that occur in harvested crops and their impact on quality and shelf life.
2. Learn proper post-harvest handling techniques, including harvesting, sorting, grading, packaging, and storage, to minimize losses and maintain product quality.
3. Gain knowledge of post-harvest treatments, such as washing, waxing, and controlled atmosphere storage, to extend the shelf life of perishable products.
4. Implement quality control measures to ensure that harvested products meet market standards and consumer expectations.
5. Explore and develop value-added products from harvested crops, such as processing fruits into jams or juices, to increase profitability and reduce waste.

Outcomes:

1. Develop proficiency in post-harvest handling techniques, including sorting, grading, and packaging, to maintain product quality and minimize losses.
2. Acquire knowledge of various post-harvest treatments, such as washing, waxing, and irradiation, and their effects on shelf life and quality of harvested products.
3. Understand the importance of quality control measures in post-harvest management and learn how to implement them effectively to ensure product quality and safety.
4. Gain the ability to implement proper storage techniques, such as cold storage and controlled atmosphere storage, to prolong the shelf life of perishable products.
5. Develop skills in developing value-added products from harvested crops, such as processing fruits into juices or snacks, to add value and increase marketability.

F. Y. B. Sc. Botany [Semester - I]
Course Category – Skill Enhancement Course (SEC)
Course Code – SEC-102-BOT-P

Course Title: Post-Harvest Technology

[No. of Credits: 2 C]

[No. of Lectures: 60 L]

Sr. No.	Topic Details	Weightage
1	To demonstrate the methods of post-harvest handling - Harvesting, Precooling, Sorting, Grading, Packaging with the help of ICT Tools	1 P
2	To demonstrate the methods of Sorting and Grading	1 P
3	To study the preparation of Jam, Jellies and Candies.	3 P
4	To demonstrate the equipment's and technology used in Food Processing with the help of ICT tools	1 P
5	To study the preparation of Tomato sauce, puree and ketch up	2 P
6	To study the preparation of crush, squash and syrup	3 P
7	To study the preparation of pickles from fruits /vegetables	1 P
8	To study the preparation of Aloe vera gel	1 P
9	Visit to fruit processing industry/ cold storage/ fruits ripening unit	2 P

F. Y. B. Sc. Botany [Semester - I]
Course Category – Skill Enhancement Course – Practical (SECP)
Course Code – SEC-103-BOT-P
Course Title: Algal Technology

[No. of Credits: 2 C]

[No. of Lectures: 60 L]

Objectives:

1. Gain an understanding of algal biology, including the diversity of algae species, their classification, and their ecological roles.
2. Learn various techniques for cultivating algae, including open pond systems, closed photo-bioreactors, and hybrid systems, to maximize biomass production.
3. Acquire skills in harvesting algae biomass and processing it into valuable products, such as biofuels, biofertilizers, and nutraceuticals.
4. Understand the potential of algae in bioremediation, including their ability to remove pollutants from water and air, and develop skills in applying algal technology for environmental remediation.
5. Develop skills in the development of value-added products from algae, such as cosmetics, pharmaceuticals, and food additives, to explore the commercial potential of algal technology.

Outcomes:

1. Develop proficiency in cultivating algae using various methods, including open pond systems and photobioreactors, to maximize biomass production.
2. Acquire expertise in harvesting algae biomass and processing it into valuable products, such as biofuels, biofertilizers, and high-value chemicals.
3. Gain knowledge of algal biotechnology techniques, such as genetic engineering and strain selection, to enhance algal productivity and product quality.
4. Develop skills in using algae for bioremediation purposes, including the removal of pollutants from wastewater and the sequestration of carbon dioxide from the atmosphere.
5. Develop the ability to develop innovative algal-based products, such as cosmetics, pharmaceuticals, and functional foods, to meet market demands and promote sustainable development.

F. Y. B. Sc. Botany [Semester - I]
Course Category – Skill Enhancement Course – Practical (SECP)
Course Code – SEC-103-BOT-P
Course Title: Algal Technology

[No. of Credits: 2 C]

[No. of Lectures: 60 L]

Sr. No.	Title of the Practical	No. of Practical
1	To study the methods of collection, preservation and staining of algae.	1 P
2	Study of algae from fresh water bodies.	1 P
3	Study of thallus organization of - Unicellular algae - Non motile: <i>Chlorella</i> and Motile: <i>Chlamydomonas</i> ; Colonial algae - <i>Volvox</i> ; Filamentous algae : <i>Anabaena / Spirogyra</i> ; Siphonous algae : <i>Caulerpa / Chara</i> ; Parenchymatous algae: <i>Sargassum / Gracillaria</i> .	2 P
4	Preparation of culture media for fresh water algae - Bolds Basal medium for Blue Green Algae, Modified Chu-10 medium, Nitsch medium. (Demonstration).	1 P
5	Isolation of algae by dilution and streak culture technique (Demonstration).	1 P
6	Cultivation of <i>Spirulina</i> .	1 P
7	Study of commercial products of <i>Spirulina</i> .	1 P
8	Utilization of algae in Biofuel, agriculture and pharmaceuticals industries. (Demonstration).	1 P
9	Utilization of algae in food and fodder industry, algae and space research. (Demonstration).	1 P
10	Preparation of culture media for BGA.	1 P
11	Preparation of Blue Green Algae as a Biofertilizers.	1 P
12	Study of waste water algae.	1 P
13	Study of algal bioluminescence (Demonstration).	1 P
14	Visit to nearby ponds rivers lakes and polluted habitats to study fresh water or marine water algal habitats and submission of visit report.	1 P

F. Y. B. Sc. Botany [Semester - II]**Course Code - BOT-151-T****Course Title: Plant Morphology****[No. of Credits: 2 C]****[No. of Lectures: 30 L]**

Course Objectives:

1. To introduce students to the fundamental concepts of plant morphology, focusing on root, stem, leaf, inflorescence, flower, fruit, and seed structures, their modifications, and functions in various plant species.
2. To Explore Plant Organ Modifications: Various modifications in plant organs (roots, stems, leaves, etc.) and understand their adaptive functions in response to environmental conditions, ecological interactions, and plant survival strategies.
3. To develop an understanding of the complex structure of flowers, floral symmetry, and the various types of inflorescences, along with their role in reproduction and pollination strategies.
4. To provide students with practical knowledge of the diverse plant structures through lab work and real-life examples, enabling them to identify and categorize plants based on their morphological traits.
5. To encourage critical thinking about plant adaptations to different environments, linking morphology with ecological and evolutionary perspectives.

Course Outcomes:

1. Students will be able to identify, describe, and differentiate between the various types of plant organs (roots, stems, leaves, flowers) and their modifications, based on morphological traits.
2. Students will develop the ability to analyze how specific morphological features of plants such as modified roots, stems, and leaves serve particular ecological functions, enhancing their survival in various habitats.
3. Students will be able to explain the morphology of flowers and inflorescences, including the different types and structures of floral whorls and their roles in the plant's reproductive process.
4. Students will gain a comprehensive understanding of the morphology of fruits and seeds, enabling them to distinguish between different types and understand their role in seed dispersal and plant reproduction.
5. By the end of the course, students will have the skills to examine plant specimens in the field and laboratory, classifying them based on morphological features and demonstrating an understanding of plant function and evolution.

F. Y. B. Sc. Botany [Semester - II]**Course Code - BOT-151-T****Course Title: Plant Morphology****[No. of Credits: 2 C]****[No. of Lectures: 30 L]**

Sr. No.	Topic Details	No. of Lectures
	Credit-I	15
1	Introduction to Plant Morphology 1.1 Introduction, Definition; Types of morphology – Descriptive and Interpretative. 1.2 Importance of Morphology.	02
2	Root Morphology 2.1 Definition, Parts of root; Types – Tap root and fibrous/adventitious 2.2 Modifications of roots – Aerial roots (Hanging roots) with velamen tissue in Epiphytes; Haustorial (sucking) roots in Parasites - <i>Cuscuta</i> , Respiratory roots/Pneumatophores in Mangrove; Fleshy/Storage roots- Conical, Fusiform, Napiform, and Tuberos roots; Roots modified for Mechanical supports–Stilt, Prop, Climbing, and Clinging roots with examples. 2.3 Functions of roots.	03
3	Stem Morphology 3.1 Definition, Parts of stem – nodes, internodes, buds, types of buds (Apical, Axillary, Accessory Adventitious and Floral). 3.2 Types of stem – a) Erect–Strong, Weak (Creepers, Trailers and Climbers); b) Prostrate –Procumbent, Decumbent and Diffuse; Modifications of stem – a) Aerial – Phylloclade, Bulbil b) Sub-aerial – Runner, Sucker, Stolon, Offset; c) Underground –Rhizome, Corm, Tuber, Bulb (Tunicate and Scaly). 3.3 Functions of stem.	03
4	Leaf Morphology 4.1 Definition, Parts of leaf; Stipule, Petiole, Leaf margins, Apices and Base, Surface, Venation, Phyllotaxy, Leaf duration (Caducous, Deciduous, Persistent- Evergreen). 4.2 Types of leaves – Simple and Compound – Pinnately (Unipinnate – Paripinnate and Imparipinnate; Bipinnate, Tripinnate and Decompound) and Palmately (Uni-, Bi-, Tri-, Quadri- and Multifoliate); Leaf Modifications: Tendrils, Spines, Phyllode, Scaly, Reproductive, Trap leaves. 4.3 Functions of leaves.	03

5	<p>Morphology of Inflorescence</p> <p>5.1 Definition, Parts of Inflorescence.</p> <p>5.2 Types of Inflorescence – a) Racemose –i) Main Axis Elongated – Raceme, Spike, Catkin, Spadix; ii) Main Axis Shortened – Umbel and Corymb; iii) Main Axis Flattened – Capitate, Head / Capitulum;</p> <p>b) Cymose –Solitary, axillary, Terminal, Uniparous (Monochasial) – Helicoid and Scorpoid, Biparous (Dichasial), Multiparous (Polychasial) Cyme;</p> <p>c) Special Type – Verticilliaster, Cyathium, Hypanthodium.</p>	04
	Credit-II	15
6.	<p>Morphology of Flower</p> <p>6.1 Definition, typical structure of flower.</p> <p>6.2 Types of flowers based on Symmetry, Insertion of floral whorls on thalamus.</p>	02
7.	<p>7.1 Floral whorls –</p> <p>I) Accessory whorls:</p> <ul style="list-style-type: none"> • Calyx: sepals, number, cohesion, types of calyx; Modifications of calyx – Petaloid, Pappus, Spurred; • Corolla: petals, number, cohesion, forms of corolla–Polypetalous Regular– Cruciform, Caryophyllous, Rosaceous; Polypetalous irregular – Papillionaceous; Gamopetalous Regular – Tubular, Infundibuliform, Campanulate, Salvar shaped, Rotate; • Gamopetalous Irregular – Bilabiate, Personate and Ligulate; <p>Perianth: tepals, number, cohesion, modifications – sepaloid and petaloid tepals.</p> <p>Aestivation– Definition; aestivation in calyx, corolla and perianth; types of aestivation.</p>	04
8.	<p>8.1 Floral whorls –</p> <p>II) Necessary / Essential whorls:</p> <ul style="list-style-type: none"> • Androecium: Stamen, Structure of stamen; Cohesion and Adhesion; • Gynoecium: Carpel / Pistil; structure of carpel; Types of gynoecium based on carpel number and fusion; <p>Placentation- Definition; types – Marginal, Parietal, Axile, Free-central, Basal, superficial.</p>	04
9.	<p>Morphology of Fruit and Seed</p> <p>9.1 Fruit: Definition and parts of fruit.</p> <p>9.2 Types of fruits</p> <p>9.3 Seed: Definition, Parts of typical seed.</p> <p>9.4 Morphology of Monocot and Dicot seeds</p>	05

F. Y. B. Sc. Botany [Semester - II]**Course Code - BOT-152-P****Course Title: Practical Based on BOT 151-BOT-T****[No. of Credits: 2 C]****[No. of Lectures: 30 L]****Course Objectives:**

1. To provide students with practical knowledge through the study of plant organs such as roots, stems, leaves, flowers, and fruits, enabling them to identify and understand their types, modifications, and functions.
2. To train students to identify and classify various plant species based on their morphological features, including roots, stems, leaves, flowers, and fruits, using examples from common angiosperms.
3. To enhance observational skills through practicals involving the study of floral and fruit morphology, where students will analyze the structure of flowers and fruits in detail.
4. To enable students to explore the diversity of plant forms, modifications, and adaptations in different plant species, enriching their knowledge of plant morphology and ecology.
5. To give students real-world exposure to plant species in their natural habitats, encouraging fieldwork and learning about plant diversity and ecological interactions through an excursion.

Course Outcomes:

1. Upon completion, students will be able to identify and describe various types and modifications of plant organs (roots, stems, leaves, flowers, fruits) using real-life examples from their practical sessions.
2. Students will gain an understanding of the functional significance of morphological modifications, such as modified roots, stems, and leaves, and will be able to connect these adaptations with the plant's ecological role.
3. Students will be able to analyze and identify the structure and types of floral whorls (calyx, corolla, androecium, and gynoecium) and the types of fruits based on their morphological characteristics, enhancing their understanding of reproductive biology.
4. Students will acquire the skills to classify and document plant species based on their morphological features and will be able to distinguish between different types of plants based on their root, stem, leaf, flower, and fruit structures.
5. After the botanical excursion, students will be able to recognize and document angiosperms in their local environment, applying theoretical knowledge to real-world observations and enhancing their understanding of plant diversity and ecological relationships.

F. Y. B. Sc. Botany [Semester - II]

Course Code - BOT-152-P

Course Title: Practical Based on BOT 151-BOT-T

[No. of Credits: 2 C]

[No. of Lectures: 30 L]

Sr. No.	Title of the Practical	No. of Practical
1.	Study of root w.r.t. its types and modifications.	1P
2.	Study of stem w.r.t. its types and modifications.	1P
3.	Study of leaf w.r.t. its types and modifications.	2P
4.	Study of inflorescence	2P
5.	Study of typical flower w.r.t. floral whorl calyx (<i>Hibiscus, Datura, Brassica, Glyricidia / Clitoria / Bean, Adhatoda / Ocimum, Polyanthus, Bouganvelia, Citrus, Sunflower, Cucurbita</i>)	1P
6.	Study of typical flower w.r.t. floral whorls corolla and perianth, (<i>Hibiscus, Datura, Brassica, Glyricidia / Clitoria / Bean, Adhatoda / Ocimum, Polyanthus, Bouganvelia, Citrus, Sunflower, Cucurbita</i>)	1P
7.	Study of typical flower w.r.t. floral whorl- androecium, (<i>Hibiscus, Datura, Brassica, Glyricidia / Clitoria / Bean, Adhatoda / Ocimum, Polyanthus, Bouganvelia, Citrus, Sunflower, Cucurbita</i>)	1P
8.	Study of typical flower w.r.t. floral whorl -gynoecium (<i>Hibiscus, Datura, Brassica, Glyricidia / Clitoria / Bean, Adhatoda / Ocimum, Polyanthus, Bouganvelia, Citrus, Sunflower, Cucurbita</i>)	1P
9.	Study of types of fruits.	2 P
10.	Botanical Excursion to nearby locality to explore angiosperms	1 P

Note: Any twelve practical's to be conducted from above mentioned list

F.Y.B.Sc. Botany [Semester-II]**Course Category – Generic Elective / Open Elective (OE)****Course Code – OE-151-BOT-P****Course Title: Fruit Processing and Flower Arrangement****[No. of Credits: 2 C]****[No. of Lectures: 60 L]****OBJECTIVES:**

1. To equip students with hands-on experience in various fruit processing techniques, such as canning, drying, freezing, and making jams, jellies, and preserves.
2. To explore the use of different preservatives, packaging techniques, and storage conditions that enhance the shelf life and safety of processed fruits.
3. To develop students' skills in designing and creating various types of flower arrangements, including bouquets, centerpieces, corsages, and wreaths.
4. To teach students the principles of floral design, such as balance, harmony, color theory, and the use of different floral materials and tools.
5. To encourage students to express their creativity through innovative and aesthetically pleasing flower arrangements.
6. To bridge the gap between theoretical knowledge and practical applications by exposing students to the fruit processing industry and the floral design market.

OUTCOMES:

1. Students will demonstrate the ability to perform various fruit processing techniques, such as canning, drying, freezing, and making jams, jellies, and preserves, ensuring the preservation of nutritional value, flavor, and texture of fruits.
2. Students will understand the chemical and biological processes involved in fruit spoilage and the methods used to prevent it. They will be able to apply different preservatives, packaging techniques, and storage conditions to enhance the shelf life and safety of processed fruits.
3. Students will be skilled in designing and creating various types of flower arrangements. They will apply principles of floral design and the use of different floral materials and tools.
4. Students will be able to express their creativity through innovative and aesthetically pleasing flower arrangements.
5. Students will bridge the gap between theoretical knowledge and practical applications by gaining exposure to the fruit processing industry and the floral design market.

Course Category – Generic Elective / Open Elective (OE)
Course Code – OE-152-BOT-P

Course Title: Mushroom technology

[No. of Credits: 2 C]

[No. of Lectures: 60 L]

OBJECTIVES:

1. To provide students with a comprehensive understanding of the biology, taxonomy, and ecological roles of different mushroom species and familiarize them with the various types of edible and medicinal mushrooms, their nutritional benefits, and their economic importance.
2. To equip students with practical skills in mushroom cultivation, including substrate preparation, inoculation, spawn production, and environmental control.
3. To provide insights into the setup and management of a mushroom farm, including the selection of suitable cultivation sites, construction of mushroom houses, and implementation of hygiene and sanitation practices.
4. To educate students on post-harvest handling techniques, including cleaning, packaging, storage, and transportation of mushrooms to maintain their quality and extend shelf life.
5. To introduce students to the economic aspects of mushroom production, including cost analysis, market trends, and pricing strategies.
6. To inspire students to engage in research and innovation within the field of mushroom technology, exploring new cultivation techniques, substrate materials, and mushroom species.

OUTCOMES:

1. Students will demonstrate a thorough understanding of the biology, taxonomy, and ecological roles of different mushroom species, recognizing their nutritional and economic importance.
2. Students will acquire practical skills in various mushroom cultivation techniques, including substrate preparation, inoculation, spawn production, and environmental control, successfully cultivating different species.
3. Students will be able to set up and manage a mushroom farm, implementing effective hygiene and sanitation practices, pest and disease management strategies, and crop rotation to ensure high yield and quality.
4. Students will master post-harvest handling techniques, including cleaning, packaging, storage, and transportation, to maintain mushroom quality and extend shelf life. They will also be skilled in value-added processing, such as drying and canning.
5. Students will understand the economic aspects of mushroom production, including cost analysis and market trends.
6. Students will successfully apply their theoretical knowledge to practical scenarios, demonstrating the ability to solve problems and optimize mushroom production processes.
7. Students will develop entrepreneurial skills, including business planning and management, enabling them to start and manage their own mushroom cultivation enterprises.

F.Y.B.Sc. Botany [Semester-II]**Course Category – Generic Elective / Open Elective (OE)****Course Code – OE-152-BOT-P****Course Title: Mushroom technology****[No. of Credits: 2 C]****[No. of Lectures: 60 L]**

Sr. No.	Practical	No. of Practical
1	To study the morphology of mushroom.	2 P
2	Demonstrate equipment's required for mushroom production	1 P
3	To demonstrate types of mushrooms.	1 P
4	Demonstrate preparation of spawn with the help of flow diagram	1 P
5	To Prepare any suitable bed for cultivation of Oyster mushroom	2 P
6	To demonstrate harvesting of mushrooms.	1 P
7	To perform any suitable method for mushroom preservation	1 P
8	Preparations of different types of Mushroom recipes. (Any two) Eg. Mushroom Pulao, Mushroom soup, mushroom Omelets, Mushroom Pakora, Mushroom curry, Mushroom pickles etc	4 P
9	Visit to Mushroom Growing Industry / Small scale unit and Submit the report at the time practical examination.	2 P

Course Title: Vertical and Terrace Gardening

[No. of Credits: 2 C]

[No. of Lectures: 60 L]

OBJECTIVES:

1. To provide students with a comprehensive understanding of the principles and benefits of vertical gardening and familiarize them with different types of vertical gardening.
2. To educate students on the basic requirements and materials needed for vertical gardening and the importance of controlled conditions in maintaining healthy vertical gardens.
3. To equip students with practical skills in preparing small and large scale vertical gardens and encourage creativity and sustainability by preparing vertical gardens using recyclable materials.
4. To introduce students to advanced vertical gardening techniques, such as hydroponic and aquaponics systems, teaching them the principles and setup of soil-less gardening.
5. To provide insights into permaculture and edible landscaping, teaching students the concepts and benefits of designing sustainable, food-producing gardens.
6. To educate students on the different irrigation systems and fertilizer application methods suitable for vertical gardens, ensuring efficient water and nutrient delivery.
7. To organize visits to vertical gardens, local nurseries, garden centres, workshops, and events on vertical gardening, providing students with practical exposure and industry insights.

OUTCOMES:

1. Students will be proficient in various methods of establishing vertical gardens for the selection to select appropriate structures based on environmental and spatial considerations.
2. Graduates will be adept at incorporating sustainable gardening practices, such as using recyclable materials and preparing kitchen waste manure, thereby promoting environmental stewardship and waste reduction in gardening.
3. Students will acquire hands-on experience in setting up and maintaining soil-less gardening systems such as hydroponics and aquaponics.
4. Participants will gain knowledge about permaculture principles and edible landscaping, equipping them with the skills to design and implement sustainable, productive green spaces that provide food resources and ecological benefits.
5. Students will learn efficient irrigation and fertilization techniques specific to vertical gardens, ensuring optimal plant growth and resource conservation.
6. Students will be prepared to engage with communities and share knowledge about vertical gardening techniques and benefits, fostering broader adoption of these practices and contributing to community well-being and urban beautification.

Course Title: Plant Preservation Techniques

[No. of Credits: 2 C]

[No. of Lectures: 60 L]

OBJECTIVES

1. Acquire knowledge about various tools and equipment essential for plant collection, focusing on their correct usage and maintenance to ensure efficient and safe botanical sampling.
2. Learn and apply different methods of drying plant specimens, to understand their applicability and effectiveness in preserving plant integrity.
3. Develop expertise in preparing pressed specimens for herbarium use, including techniques for pressing, drying, and long-term storage that ensure specimen preservation and usability for scientific research.
4. Gain practical skills in the processing of plant specimens for herbariums, fostering a comprehensive understanding of herbarium workflow and management.
5. Study and apply methods for the wet preservation of cryptogams and phanerogams, learning how to prepare and maintain specimens in fluid media to retain their morphological characteristics.
6. Explore and demonstrate contemporary preservation techniques, particularly those used in dry floral arrangements, to understand their aesthetic and practical applications in botanical science and decorative arts.
7. Participate in visits to museums, herbariums, or plant preservation processing units to gain first-hand experience of professional environments and current practices in plant preservation.

OUTCOMES:

1. Students will be proficient in the use of various tools and equipment for plant preservation, understanding their specific uses and maintenance requirements.
2. Students will demonstrate mastery in several specimen drying techniques and will be able to choose and apply the best method based on the nature of the plant material and the intended use of the specimens.
3. Students will gain skills in preparing and processing pressed specimens for herbarium storage, ensuring the longevity and utility of collected specimens for scientific research.
4. Students will acquire hands-on experience in preserving plant specimens using wet preservation methods, ensuring the preservation of cellular structures and morphological details necessary for further scientific study.
5. Students will learn and demonstrate modern methods used in the preservation of botanical specimens, particularly in creating dry floral arrangements.
6. Through visits to museums, herbariums, and plant preservation units, students will integrate classroom learning with professional practices, understanding the operational standards and challenges in botanical preservation environments.
7. Students will successfully collect, prepare, and document a variety of preserved specimens, including herbarium sheets and wet preserved samples.

Course Title: Millets for Sustainable Agriculture Development
[No. of Credits: 2 C] [No. of Lectures: 60 L]

OBJECTIVES:

1. Students will identify and classify major and minor food yielding crops, focusing on millets.
2. Students will explore and demonstrate the range of by-products derived from millets.
3. Students will learn about the nutritional values, processing methods, and typical uses of by-products of millets.
4. Students will gain knowledge on various millet-based products, focusing on value addition and sensory analysis.
5. Objected at demonstrating the utilization of different bioprocessing techniques, such as malting and fermentation. cleaning, dehulling, milling
6. Students will be expected to compile detailed reports on their visits and experiments, demonstrating their ability to document processes, results, and insights effectively.

OUTCOMES:

1. Students will acquire a comprehensive understanding of different types of millets.
2. Participants will gain detailed knowledge about the by-products of millets, and understand the processing techniques,
3. Through demonstrations and visits to processing units, students will develop hands on skills.
4. The practical will enhance students' knowledge about the cultivation, processing, and uses of millets.
5. Students will be familiar with integrated pest management (IPM) techniques for sustainable millet cultivation.

F. Y. B. Sc. Botany [Semester - II]**Course Category – Skill Enhancement Course – Practical (SECP)****Course Code – SEC-152-BOT-P****Course Title: Millets for Sustainable Agriculture Development****[No. of Credits: 2 C]****[No. of Lectures: 60 L]**

F. Y. B. Sc. Botany [Semester - II]
Course Category – Skill Enhancement Course – Practical (SECP)
Course Code – SEC-153-BOT-P
Course Title: Plant Propagation Techniques

[No. of Credits: 2 C]

[No. of Lectures: 60 L]

OBJECTIVES:

1. Enable students to identify and demonstrate the use and maintenance of various tools and equipment essential for plant propagation, ensuring a thorough understanding of their applications in horticulture.
2. Introduce students to the concepts and operational details of various plant propagation units. Utilize ICT tools to demonstrate the various climatic controls and their effects on plant growth, preparing students for modern horticultural practices.
3. Equip students with the knowledge to identify and describe various types of ornamental plants enhancing their understanding of botanical diversity and aesthetic applications.
4. Teach students the practical aspects of nursery management which are crucial skills for nursery operation.
5. Provide practical exposure to natural and artificial vegetative propagation methods to understand the biological and environmental factors that influence successful plant propagation.
6. Demonstrate various nursery management practices including different types of irrigation systems, fertilizer applications, and weed control methods. This will enable students to manage nurseries effectively and sustainably.
7. Introduce students to advanced horticultural practices to provide modern approaches and creative solutions in urban horticulture.

OUTCOMES:

1. Students will gain hands-on experience and proficiency in the use and maintenance of various tools and equipment used in plant propagation, enabling effective and efficient handling of nursery operations.
2. Students will be able to operate and manage different types of controlled environments for plant propagation.
3. Students will develop skills in identifying, categorizing, and cultivating different types of ornamental plants for enhancing their ability to design and maintain aesthetic garden spaces.
4. Students will acquire the ability to prepare nursery beds, select appropriate planting materials and containers, and effectively raise seedlings, applying their knowledge to the establishment and management of a successful nursery.
5. Students will master both natural and artificial vegetative propagation methods with diverse methods to propagate various plant species.
6. Students will demonstrate knowledge and practical skills in different types of irrigation systems, fertilizer applications, and weed control strategies, contributing to sustainable nursery and garden management.
7. Students will learn and apply advanced horticultural practices using modern tools and techniques, showcasing their capability in specialized gardening methods.
