Sub: Permission to conduct Add on Course...

Respected Sir,

With reference to above mentioned subject, I request you to permit me to conduct add on course i.e Foreign Language(GERMAN) as prescribed by SPPU for FY BBA students for Second term. Course is to be conducted mandatorily for all the students.

Details of Course:

Name of the Faculty: Mrs. Shubhada Kulkarni (M.A English, B.Ed, B1 level of German Language, Goethe University, Mumbai)

Time duration: 15 days (30 hours)

Batch size: 80 students/batch(one batch)

Fees charged: Rs. 300 per student(80*300= 24,000)

Remuneration to the faculty: Rs. 500 per hour(30 hrs*500=15000)

Miscellaneous Expenses: Rs. 2500(Stationery, Books & Certificates)

Remaining amount i.e. Rs 6500 will submitted to Account Section

Thanking You,

S.P. Daware

Mrs. S.P.Daware
(I/C H.O.D BBA)

ना.क./के.के.वाघ एज्यु.सो./ ४४० /२०२०

दिनांक : 22 JAN 2020

के.के.वाघ एज्युकेशन सोसायटी, नाशिक
कार्यकारी मंडळ मिटींग, शुक्रवार, दि.२०/१२/२०१९ च्या
ठरावाची खरी नकल

विषय क्र.२१/६: संस्था संचलित के.के. वाघ कला, वाणिज्य, विज्ञान व संगणक विज्ञान महाविद्यालय, नाशिक या महाविद्यालयात अकाउंटन्सी व इन्फॉर्मेशन टेक्नोलॉजी प्रशिक्षण घेणेबाबत.

ठराव क्र.२१/६: संस्था संचलित के.के. वाघ कला, वाणिज्य, विज्ञान व संगणक विज्ञान महाविद्यालय, नाशिक या महाविद्यालयास सावित्रीबाई फुले पुणे विद्यापीठाने विविध पारंपारिक अभ्यासक्रमास परवानगी दिलेली आहे. सदरच्या अभ्यासक्रमांसोबत विद्यार्थ्यांना अकाउंटस क्षेत्रात आधुनिक संगणकीय प्रणालीची (Tally ERP Course with GST) माहिती असणे गरजेचे आहे. नाशिक मध्ये धनश्री इंटरप्रायजेस ही इन्स्टिटयुट कलकत्ता येथील आय.सी.ए. या संस्थेसोबत संलग्न असून त्याबाबतचा प्रस्ताव प्राचार्य, के.के. वाघ कला, वाणिज्य, विज्ञान व संगणक विज्ञान महाविद्यालय, नाशिक यांच्याकडून प्राप्त झाला आहे.

याबाबत साधक बाधक चर्चा करण्यात आली व चर्चे अंती ठरले की,

- १) संस्था संचलित के.के. वाघ कला, वाणिज्य, विज्ञान व संगणक विज्ञान महाविद्यालय, नाशिक या महाविद्यालयात (Tally ERP Course with GST) हा प्रशिक्षण अभ्यासक्रम धनश्री इंटरप्रायजेस या इन्स्टिटयुट च्या सहभागाने सुरु करण्याचे ठरले.
- २) याबाबत धनश्री इंटरप्रायजेस या संस्थेसोबत बोलणी करणे, अटी शर्ती ठरविणे तसेच संस्था व महाविद्यालयाच्या वतीने करारावर सहया करण्याचे अधिकार महाविद्यालयाचे प्राचार्य अंबरसिंग पी. राजपुत यांना देण्यात आले.

ठराव एकमताने मंजूर.

सुचक : डॉ.शिरीष श्रीकृष्ण साने

अनुमोदक : श्री.अशोक रतनशी मर्चंट

Dear Sir/Madam,

Greetings from WNS Cares Foundation

This is reference to our discussion with you last week on WNS Cares Foundation Make My Career Program for your graduate students;

Please find attached file of training curriculum for this program.

Regarding your logo/name of your college on our certificate/materials; Pravin or Rucha will come and discuss.

Meanwhile please share your tentative schedule (for training) on the excel sheet.

Let us know if you have any clarification before we start this program

Date:-05/08/2019

NOTICE

All students of Computer Science are hereby informed that a "REDHAT (RHCSA)" course is scheduled in our college. All interested students are requested to enroll their names to the Co-ordinator till 15/08/2019 . Attendance is compulsory. Certificates will be issued only to those candidates who attend all the lectures & practicals

The course details are as follows-

Date:- 21/08/2019

Time -10:00am

Venue-Computer Lab -I

Fees : Rs. 3500/- per student

Co-ordinator- Mrs. Nita Nikam

Mrs. Nita Nikam
Course Co-ordinator

Prof.A.H.Bendale
IQAC Co-Ordinator/ HOD(Computer Science)

Dr.A.P.Rajput
Principal

Date : 21-12-2017

To,
The Principal,
Dr. V.M. Sewlikar
K. K. Wagh ACS and CS College,
Nashik – 422003

Subject: Course Proposal – RHCSA Under RHA And Cisco Academic Module.

Respected Sir,

We IRT Technologies Pvt. Ltd. Being Source Arbitrate, Reseller for Affiliation between Global Technologies, Test Center and Colleges with Domains Such As REDHAT | CISCO | MICROSOFT | AWS & Other trending Technologies.

IRT Currently Deliver Professional Job Oriented Trainings In More Than 25 Colleges & Universities Across India Malaysia Singapore & Mauritius, and Would Want To Propose A Global Training Of RHCSA – By Redhat to The Students Of Your College. Whereas This Course Is Offered Under Our Academic Module Students Will Be Benefited into All The Verticals, As This Course Is Preferred To Be Delivered In College Campus, College Will Also Be Remunerated For The Resource Which Will Be Used. Also, Colleges Have a Lot Of Activities to be taken care of IRT's Special Project Management Team Will Be Assigned To The College to Take Care of every Activities Related to the Course From Instructor Management , Batch Allocation, Attendance Tracker, Fees Collection, Grievance Resolution & Maintaining Report to The College.

As Per Our Discussion All the Details About the Course Is Given In The Below Table:

| Name Of Course | RHCSA (Redhat Certified System's Administrator) | CCNA(Cisco Certified Network Associate) | AWS Certified Solutions Architect |
|---------------------------------------|---|---|-----------------------------------|
| Vendor | Red Hat | Cisco | Amazon Web Services |
| Duration | 42 Hours | 48 Hours | 45 Hours |
| Course Material | One Year Official Online Portal, E-Books(SA1 + SA2) | E-Books ICND1+ICND2 | Online E-Books AWS CSA Module |
| Standard Fees (Training) | 12,000/- | 9,000/- | 15000/- |
| Academic Fees (Training) | 4,000/- | 4,000/- | 10,000/- |
| Materialized Fees (Training) | 3,500/- | 3,500 | 7,500/- |
| Resource Utility Fees Paid To College | 500/- | 500/- | 500/- |

According To the Above Mentioned,

We Would Like To Finalize The Same Onto A Formal Memorandum Of Understanding Attached. Request the Principal and Respective Management To Kindly Accept The Proposal and Initiate The MOU Process.

Thanks & Regards

IRT Technologies Pvt. Ltd

We Produce Sole IT Professionals !!.

- IRT shall enhance "K.K. Wagh Arts, Commerce, Science And Computer Science College" Faculty Team by Providing Global Training & Certification Free of Cost to One Staff Person Every Year as per the Approval of K.K. Wagh Arts, Commerce, Science And Computer Science College".
- During The Validity Of This Agreement The IRT Technologies Pvt. Ltd. Institution Will Provide 100% Placement assistance to the Certified Students .
- These Global Certification Training and Exam Cost Per Module Above 30,000/- As Per Standard Industry Pricing Which Has Been Offered To "K.K. Wagh Arts, Commerce, Science And Computer Science College" Students At Approximately Above 60% Reduced Cost Under Academy Module

K.K. WAGH ARTS, COMMERCE, SCIENCE AND COMPUTER SCIENCE COLLEGE. During This Association Shall Be Under Obligation To

- Provide The College Premises For The Global Training & Testing Where The Preferred Lab Configuration Is Core I3 Processor, 8 GB Of RAM, 1 GBPS Supported Ethernet Port And 1GBPS Switch.
- Notify The Students About The Training & Testing Commence Date.
- The College Should not Assign or Sublet the Training & Examinations for Technology which is been Delivered By IRT Technologies to any other vendor until the MOU is in Effect.
- Assign An Academic Co-Ordinator Who Shall Ensure The Normal Performance Of The Training Project, Cooperate With The Host IRT's Technical Instructor In All Aspects Affecting Them, As Well As The Tasks Set Forth In The Rules.

TERM & TERMINATION

This Agreement Shall Be Valid For One Year From Date Of Execution And May Be Tacitly Extended For Periods Of The Same Length, Unless One Of The Parties Expressly Notifies The Other Party Of Its Intention Not To Extend It At Least Two Months In Advance.

In Witness Whereof, The Parties Sign Pages Of This Agreement In 2-Copies, In The Place & One Date.

RED HAT CERTIFIED SYSTEM ADMINISTRATOR [RHCSA] Course Outline

| Days | Topics | Details |
|-----------------|---|---|
| 1 st | Pre-Requisite for RHCSA Basic Networking | Introduction To Networks Reference Models Connecting Mediums Network Topologies DHCP and DNS IP Addressing CIDR and Sub netting Networking Devices Hardware Topology Kernel |
| | Introduction (Installation) | Configuration of System Devices and their Functionality Lab Overview |
| | Command Line | Log in to a Linux system and run simple commands using the shell. |
| | Managing Files and File System Hierarchy | File operations using bash shell prompt, Understanding Absolute & relative Paths |
| | Getting Help (man) | Using help,man,pinfo,sosreport commands, viewing & printing documentations |
| | Working with Text Files and Vim (Editor) | Explain the three main mode of Vim Open, Edit, & Save text Files Use Editor Shortcuts , I/O redirections & pipelines |
| 2 nd | Local Users & Groups (U&G Administration) | Manage local Linux users and groups & administer local password policies. |
| | Permissions | Set Linux file system permissions on files and interpret the security effects of different permission settings |
| | ACLs | Manage file security using POSIX access control lists. |
| 3 rd | Networking (IPV4) | Configuring basic IPv4 networking on Red Hat Enterprise Linux systems |
| | S/w packages (yum,rpm) | Download, install, update, and manage software packages from Red Hat and yum package repositories |
| | Firewalls | Configuring basic RHEL firewall |
| 4 th | Partitions & File System | Managing partitions and file systems |
| | Logical Volume Management | Managing physical volume, volume groups & logical volumes |
| | Processes & Priorities | Obtain information about process priority and "nice" concepts |
| 5 th | Services & Daemons | Using Systemctl to manage services,daemons,sockets & targets |
| | Archiving & copying files | Managing archives , scp , rsync concepts |
| | Cron (Job Scheduling) | Schedule tasks to automatically execute in the future |
| | Open SSH | Accessing remote command line using SSH ,key based SSH & restricting SSH |
| | Logs | Analyzing & storing logs, finding events with journalctl |
| 6 th | Kick Start | Automate the installation of Red Hat Enterprise Linux systems with Kickstart |
| | Using virtualized Systems | Create and use Red Hat Enterprise Linux virtual machines with KVM & libvirt |
| | SELinux | Manage the Security Enhanced Linux (SELinux) behavior of a system to keep it secure in case of a network service compromise |
| 7 th | Network Defined users & groups | Connecting to central LDAP & Kerberos server. |
| | Boot Process | Influence the relative priorities at which Linux processes run |
| 8 th | Access NFS | Accessing simple & secure NFS shares |
| | Access Samba | Use autofs and the command line to mount and unmount SMB file systems |
| | Comprehensive Review | Practice and demonstrate the knowledge and skills learned in this course. |

WELCOME TO RED HAT ACADEMY!

We could not be more excited to begin this collaborative partnership and to empower your students to establish a promising career path within open source and Red Hat technologies. We are committed to providing you with the support and resources you will need as you join an incredible ecosystem of academic Institutions who share a similar passion for their students' lifelong success.

Our program is based on the premise that learning involves not just thinking, but doing. We want to help you challenge students with rigorous curriculum and hands-on labs that will equip them with the enterprise-ready skills needed to reach their highest potential. As we become engaged in your academic mission, we are excited to help you become a differentiator in education and guide your students along a path of success.

At Red Hat, our mission is to be the catalyst in our communities of customers, contributors, and partners, creating better technology the open source way. In a constantly evolving technology market, you are an instrumental part in helping us make a lasting impact on our communities as we believe your students will one day become the future leaders in the industry. As we work together over the coming semesters, we are united around a single vision-to see your students transform, succeed, and gain the education needed to fulfill their dreams.

Thanks again for all of your hard work and dedication to the education of your students. We are so excited to partner with you and to see all of your success as the newest Red Hat Academy!

Sincerely,

Ken Goetz
Vice President, Global Training Services

नाशिक : गुणवंत विद्यार्थ्यांसमवेत डॉ. व्ही. एन. सेवलीकर, प्राचार्य डॉ. ए. पी. राजपूत, प्रा. अर्चना बेडाळे, रोहन सोनवणे, रियाझ कुरेशी, जी. आर. शेख आदी.

‘के.के. वाघ’च्या विद्यार्थ्यांचा सत्कार

नाशिक : के. के. वाघ कला, वाणिज्य, विज्ञान व संगणक विज्ञान महाविद्यालयामध्ये विद्यार्थ्यांसाठी आयआरटी टेक्नॉलॉजीतर्फे रेडहॅट सर्टिफाइड सिस्टीम अॅडमिनिस्ट्रेटर कोर्स घेण्यात आला. महाविद्यालयातील एकूण १७ विद्यार्थ्यांनी हा कोर्स पूर्ण केला. त्यापैकी आठ विद्यार्थ्यांनी परीक्षा देऊन रेडहॅट सर्टिफाइड सिस्टीम अॅडमिनिस्ट्रेटर या पदाचे ग्लोबल सर्टिफिकेशन प्राप्त केले. संस्थेच्या सरस्वती कॉम्पसचे समन्वयक डॉ. व्ही. एन. सेवलीकर, महाविद्यालयाचे प्राचार्य डॉ. ए. पी. राजपूत व विभागप्रमुख प्रा. अर्चना बेडाळे यांच्या हस्ते विद्यार्थ्यांना गौरविण्यात आले. यावेळी आयआरटी अकॅडमीचे सदस्य रोहन सोनवणे, रियाझ कुरेशी, जी. आर. शेख उपस्थित होते. याप्रसंगी आय. आर. टी. टेक्नालाजीच्या सदस्यांनी विद्यार्थ्यांना रेडहॅट अॅडमिनिस्ट्रेटरचा सत्कार केले.

के. के. वाघ, दि - २३/०९/२०२२, पृ. नं - ०९

XX क. का. वाघ संगणक
महाविद्यालयात सत्कार

नाशिक : येथील क. का. वाघ कला,
वाणिज्य, विज्ञान व संगणक विज्ञान
महाविद्यालयात आय.आर.टी.
टेक्नॉलॉजीच्या वतीने रेडहॅट
अभ्यासक्रमावर आधारित रेडहॅट
सर्टिफाइड सिस्टीम अॅडमिनीस्ट्रेटर हा
कोर्स घेण्यात आला. १७
विद्यार्थ्यांपैकी ८ विद्यार्थ्यांनी रेड हॅट
पदाचे ग्लोबल सर्टिफिकेशन प्राप्त
केल्याने त्यांचा सत्कार करण्यात
आला. याप्रसंगी संस्थेच्या सरस्वती
कॅम्पसचे समन्वयक डॉ. व्ही. एम.
सेवलीकर, महाविद्यालयाचे प्राचार्य डॉ.
ए. पी. राजपूत, विभागप्रमुख प्रा.
अर्चना बेंडाले यांच्या हस्ते विद्यार्थ्यांना
प्रमाणपत्र देऊन गौरविण्यात आले.
यावेळी आयआरटी अकॅडमीचे सदस्य
रोहन सोनवणे, सियाझ कुशेशी, जी.
आर. शेख आदी उपस्थित होते.
विद्यार्थ्यांना रेडहॅट अभ्यासक्रमाबद्दल
मार्गदर्शन करण्यात आले.

Redhat Felicitation program

In K.K. Wagh Sr. College, Nashik, Redhat Felicitation program was held on 17 Dec 2019.

Guest of this lecture was Gayaz Shaikh (Head Resource, IRT), Riyaz Quereshi (Senior Trainer), Mayur More (Technical Trainer, IRT), Dushant Koche (Executive Director) also Present for this program.

In this program 16 students who have completed RHCSA course were felicitated by Dr. V.M. Sewlikar, Dr. A.P. Rajput and Prof. A.H. Bendale. On this day RHA day was also celebrated by conducting different games and competitions. Workshop for the RedHat course was also held on the same day.

Safe Laboratory Practices & Procedures

Tip #1: Ask yourself, "What am I working with? What are the hazards?"

- Common hazards in the laboratory include: animal, biological, chemical, physical, and radiological. If there is an accident or emergency situation involving these hazards:
 - Seek immediate assistance. If you are splashed by any of these materials, use running water from an eyewash station or emergency shower for at least 15 minutes or until emergency assistance arrives and provides you with different instructions.
 - Report to your supervisor any accident, injury, or uncontrolled release of potentially hazardous materials - no matter how trivial the accident, injury, or release may appear.

Tip #2: Be prepared.

- Attend all required laboratory safety training prior to the start of your research assignment.
- Read all procedures and associated safety information prior to the start of an experiment.
- Perform only those experiments authorized by your supervisor.
- Follow all written and verbal instructions. Ask for assistance if you need guidance or help.
- Work under direct supervision at all times. Never work alone in the laboratory.
- Know the locations and operating procedures for all safety equipment. This includes the eyewash station and safety shower.
- Know the locations of the nearest fire alarms and at least two ways out of the building. Never use an elevator in emergencies.
- Be alert and proceed with caution at all times in the laboratory. Immediately notify the supervisor of any unsafe conditions.
- Know the proper emergency response procedures for accidents or injuries in the laboratory.

Tip #3: Prevent potential exposure.

- Conduct yourself in a responsible and professional manner at all times. No pranks. No practical jokes.
- Dress for work in the laboratory. Wear clothing and shoes that cover exposed skin and protect you from potential splashes. Tie back long hair, jewelry, or anything that may catch in equipment.

- Never eat food, drink beverages, chew gum, apply cosmetics (including lip balm), or handle contact lenses in the laboratory.
- Use a chemical fume hood or biosafety cabinet, as directed by your supervisor.
- Observe good housekeeping - keep aisles clear.
- Report damaged electrical equipment to the supervisor. Do not use damaged electrical equipment.
- Do not leave active experiments unattended. Never leave anything that is being heated or is visibly reacting unattended.

Tip #4: Protect yourself, others, your research, and the environment.

- Practice good personal hygiene. Wash your hands after removing gloves, before leaving the laboratory, and after handling a potentially hazardous material.
- While working in the laboratory, wear personal protective equipment - eye protection, gloves, laboratory coat - as directed by your supervisor.
- Properly segregate and dispose of all laboratory waste.

Lab Safety Rules and Guidelines

We list some of the most common lab safety rules out there, to help you whether you're developing or updating a set of policies for your own lab

December 6th, 2017

LAB MANAGER

Having a strong set of overall laboratory safety rules is essential to avoiding disasters in the lab. *Lab Manager* recently scoured the safety policies of several laboratories to determine some of the most common lab safety rules out there, to help you whether you're developing or updating a set of policies for your own lab. Of course, safety rules are only effective when they are enforced, which is why strong lab management is so important to a safe laboratory as well. Knowing the proper laboratory safety signs and symbols is also important.

Here are the safety rules that most commonly came up in our look at several laboratories' policies:

General lab safety rules

19. Never lift any glassware, solutions, or other types of apparatus above eye level.
20. Never smell or taste chemicals.
21. Do not pipette by mouth.
22. Make sure you always follow the proper procedures for disposing lab waste.
23. Report all injuries, accidents, and broken equipment or glass right away, even if the incident seems small or unimportant.
24. If you have been injured, yell out immediately and as loud as you can to ensure you get help.
25. In the event of a chemical splashing into your eye(s) or on your skin, immediately flush the affected area(s) with running water for at least 20 minutes.
26. If you notice any unsafe conditions in the lab, let your supervisor know as soon as possible.

Housekeeping safety rules

Laboratory housekeeping rules also apply to most facilities and deal with the basic upkeep, tidiness, and maintenance of a safe laboratory.

1. Always keep your work area(s) tidy and clean.
2. Make sure that all eye wash stations, emergency showers, fire extinguishers, and exits are always unobstructed and accessible.
3. Only materials you require for your work should be kept in your work area. Everything else should be stored safely out of the way.
4. Only lightweight items should be stored on top of cabinets; heavier items should always be kept at the bottom.
5. Solids should always be kept out of the laboratory sink.
6. Any equipment that requires air flow or ventilation to prevent overheating should always be kept clear.

Dress code safety rules

As you'd expect, laboratory dress codes set a clear policy for the clothing employees should avoid wearing in order to prevent accidents or injuries in the lab. For example skirts and shorts might be nice for enjoying the warm weather outside, but quickly become a liability in the lab where skin can be exposed to heat or dangerous chemicals.

1. Always tie back hair that is chin-length or longer.
2. Make sure that loose clothing or dangling jewelry is secured, or avoid wearing it in the first place.
3. Never wear sandals or other open-toed shoes in the lab. Footwear should always cover the foot completely.
4. Never wear shorts or skirts in the lab.
5. When working with Bunsen burners, lighted splints, matches, etc., acrylic nails are not allowed.

Personal protection safety rules

Unlike laboratory dress code policies, rules for personal protection cover what employees *should* be wearing in the lab in order to protect themselves from various hazards, as well as basic hygiene rules to follow to avoid any sort of contamination.

1. When working with equipment, hazardous materials, glassware, heat, and/or chemicals, always wear face shields or safety glasses.
2. When handling any toxic or hazardous agent, always wear the appropriate gloves.
3. When performing laboratory experiments, you should always wear a smock or lab coat.
4. Before leaving the lab or eating, always wash your hands.
5. After performing an experiment, you should always wash your hands with soap and water.
6. When using lab equipment and chemicals, be sure to keep your hands away from your body, mouth, eyes, and face.

Electrical safety rules

Like almost every other workplace, laboratories contain electronic equipment. Electrical safety rules help prevent the misuse of electrical instruments, electric shocks and other injuries, and ensure that any damaged equipment, cords, or plugs are reported to the appropriate authorities so they can be repaired or replaced.

1. Before using any high voltage equipment (voltages above 50Vrms ac and 50V dc), make sure you get permission from your lab supervisor.
2. High voltage equipment should not be changed or modified in any way.
3. Always turn off a high voltage power supply when you are attaching it.
4. Use only one hand if you need to adjust any high voltage equipment. It's safest to place your other hand either behind your back or in a pocket.
5. Make sure all electrical panels are unobstructed and easily accessible.
6. Whenever you can, avoid using extension cords.

Electrical safety rules

Like almost every other workplace, laboratories contain electronic equipment. Electrical safety rules help prevent the misuse of electronic instruments, electric shocks and other injuries, and ensure that any damaged equipment, cables or plugs are reported to the appropriate authorities so they can be repaired or replaced.

1. Before using any high voltage equipment (voltages above 50Vrms ac and 50V dc), make sure you get permission from your lab supervisor.
2. High voltage equipment should not be changed or modified in any way.
3. Always turn off a high voltage power supply when you are attaching it.
4. Use only one hand if you need to touch any high voltage equipment. It's safest to place your other hand either behind your back or in a pocket.
5. Make sure all electrical panels are well constructed and easily accessible.
6. Whenever you can, avoid using extension cords.

10. If a chemical spill occurs, clean it up right away.
11. Ensure that all chemical waste is disposed of properly.

Chemistry lab safety rules

As chemistry labs are one of the most common types, these basic chemistry lab safety rules are relevant to many scientists, dealing with the safe performance of common activities and tasks in the average chemistry lab:

1. Before you start an experiment, make sure you are fully aware of the hazards of the materials you'll be using.
2. When refluxing, distilling, or transferring volatile liquids, always exercise extreme caution.
3. Always pour chemicals from large containers to smaller ones.
4. Never pour chemicals that have been used back into the stock container.
5. Never tap flasks that are under vacuum.
6. Chemicals should never be mixed, measured, or heated in front of your face.
7. Water should not be poured into concentrated acid. Instead, pour acid slowly into water while stirring constantly. In many cases, mixing acid with water is exothermic.

Chemical safety rules

Since almost every lab uses chemicals of some sort, chemical safety rules are a must. Following these policies helps employees avoid spills and other accidents, as well as damage to the environment outside of the lab. These rules also set a clear procedure for employees to follow in the event that a spill does occur, in order to ensure it is cleaned up properly and injuries are avoided.

1. Every chemical should be treated as though it were dangerous.
2. Do not allow any solvent to come into contact with your skin.
3. All chemicals should always be clearly labeled with the name of the substance, its concentration, the date it was received, and the name of the person responsible for it.
4. Before removing any of the contents from a chemical bottle, read the label twice.
5. Never take more chemicals from a bottle than you need for your work.
6. Do not put unused chemicals back into their original container.
7. Chemicals or other materials should never be taken out of the laboratory.
8. Chemicals should never be mixed in sink drains.
9. Flammable and volatile chemicals should only be used in a fume hood.

Laser safety rules

Perhaps not as common as some of the other laboratory safety rules listed here, many laboratories do use lasers and it's important to follow some key rules of thumb to prevent injuries. In particular, accidents due to reflection are something that many employees may not think about. A clear set of rules for the use of lasers is essential to ensure that everyone is aware of all hazards and that the appropriate personal protective equipment is worn at all times.

1. Even if you are certain that a laser beam is "eye" safe or low power, you should never look into it.
2. Always wear the appropriate goggles in areas of the lab where lasers are present. The most common laser injuries are those caused by scattered laser light reflecting either off the shiny surface of optical tables, the sides of mirrors, or off of mountings. Goggles will help you avoid damage from such scattered light.
3. You should never keep your head at the same level as the laser beam.
4. Always keep the laser beam at or below chest level.
5. Laser beams should never be allowed to spread into the lab. Beam stops should always be used to intercept laser beams.
6. Do not walk through laser beams.

Know Emergency Procedures

- Know where the nearest emergency eyewash and showers are, and how to use them.
- Know at least two exits from the laboratory area in case of an emergency.
- In the event of an emergency, pull the nearest "Pull BOX", evacuate the area, and close all doors.

Proposal for Certificate Course in Basic IOT Technology

About the IOT Course

The Internet has created a truly connected world. It has enable humans to share data and information. Now, time has come to connect living as well as non-living things to the Internet. This integration of humans and things with the Internet is called IOT(Internet of Things). It is expected that about 50 billion devices will be connected to the Internet by the year 2020.

IOT is enabling next generation systems and services that encompass several domains such as e-Governance, Health Care, Transportation, Waste Management, Food Supply Chains, Energy, Insurance etc. It is also helping business to increase productivity of their organizations and optimize the consumption of various resources.

Company giants like **Microsoft, CISCO, Intel, Facebook, Amazon, IBM, GE, Tesla, Google** are vigorously working in the IOT field. This has resulted in high demand of IOT skilled manpower. Cognifront has designed a set of courses on IOT Technology for Engineering students.

Highlights of the Course

- Step-by-Step Teaching and Learning Methodology
- Real Life Examples and Hands IOT Activities
- Domain Specific Applications
- Certification

Duration

- Total Duration : 5 days (3hrs/day)

Timings

- As per convenience of the college.

Implementation

- Cognifront will arrange IOT Kits for hands-on during the course only.
- Course will be conducted on the campus of the College.

Fees

- Rs. 500 per student

Batch Size

- 30 candidates or more

Certification

- Certificates will be issued by Cognifront after completion of the Course

Contents

| SN | Topics | Activity |
|----|--|---------------------|
| 1 | Introduction to IOT Technology | Lecture |
| 2 | Sensors, Actuators and Microcontroller | Lecture |
| 3 | Architecture of Arduino Board | Lecture |
| 4 | Using IDE and Serial Monitors | Lecture + Practical |
| 5 | Interfacing Push Buttons, LEDs, LCD, Buzzer | Lecture + Practical |
| 6 | Interfacing Ultrasonic, LDR and DHT11 sensors | Lecture + Practical |
| 7 | Interfacing DC/Servo Motor | Lecture + Practical |
| 8 | Access Control and Identification using RFID | Lecture + Practical |
| 9 | Wireless Communication through Bluetooth | Lecture + Demo |
| 10 | Architecture of Raspberry Pi | Lecture |
| 11 | Sensor Interfacing with Raspberry Pi Led Bar, Buzzer, DHT11 | Lecture + Demo |
| 12 | Architecture of NodeMCU | Lecture |
| 13 | ThingSpeak IOT Cloud Platform | Lecture |
| 14 | Data Communication with Cloud through WiFi using NodeMCU and Raspberry Pi | Lecture + Demo |
| 15 | IOT Applications | Lecture |
| 16 | Projects Ideas (Discussions) | Interaction |

Fee Sharing between Cognifront and College:

- Cognifront share : Rs. 450 per student
- College share : Rs. 50 per student

IoT Certificate course For M.Sc (CS) I

Date: 23/09/2019 to 28/09/2019

Company Name: Cognifront Lab Nashik

नाशिक : आयओटी कार्यशाळेत विद्यार्थ्यांना मार्गदर्शन करताना स्वराज तोडे.

वाघ महाविद्यालयात कार्यशाळा

नाशिक : के.के.वाघ कला, वाणिज्य, विज्ञान व संगणक विज्ञान महाविद्यालयात प्रथम वर्ष पदवीतर विद्यार्थ्यांचा पाच दिवसीय आयओटी कार्यशाळा घेण्यात आली. विद्यार्थ्यांना नवीन तंत्रज्ञान मिळावे, त्यांना प्रगतिशील जगात स्पर्धा करण्यात मदत व्हावी, यासाठी संस्थेतर्फे विविध उपक्रम घेण्यात येतात. त्या पार्श्वभूमीवर महाविद्यालय आणि कॉर्पोरॉट कंपनी संयुक्त विद्यमाने ही कार्यशाळा पार पडली. कार्यशाळेच्या माध्यमातून विद्यार्थ्यांना स्वराज तोडे, अनिता महाले, योगिता पाटील, ऋतुजा महाजन यांनी सखोल मार्गदर्शन केले. कार्यशाळेच्या समारोपप्रसंगी संस्थेच्या सरस्वतीनगर कॅम्पसचे समन्वयक डॉ.व्ही.एम.सेवलीकर, प्राचार्य डॉ.ए.पी.पाटील, संगणक विज्ञान विभागप्रमुख प्रा.ए.एच.वेंडाळे उपस्थित होते. कार्यक्रमाचे नियोजन प्रा.पवन मालाणी, प्रा. हर्षल दंडगव्हाळ यांनी केले.

HOD(Science)

First aid

First aid is the assistance given to any person suffering a sudden illness or injury,^[1] with care provided to preserve life, prevent the condition from worsening, or to promote recovery. It includes initial intervention in a serious condition prior to professional medical help being available, such as performing cardiopulmonary resuscitation (CPR) while awaiting an ambulance, as well as the complete treatment of minor conditions, such as applying a plaster to a cut. First aid is generally performed by someone with basic medical training. Mental health first aid is an extension of the concept of first aid to cover mental health.

There are many situations which may require first aid, and many countries have legislation, regulation, or guidance which specifies a minimum level of first aid provision in certain circumstances. This can include specific training or equipment to be available in the workplace (such as an automated external defibrillator), the provision of specialist first aid cover at public gatherings, or mandatory first aid training within schools. First aid, however, does not necessarily require any particular equipment or prior knowledge, and can involve improvisation with materials available at the time, often by untrained people.^[2]

First aid can be performed on all mammals, although this article relates to the care of human patients.

Early history and warfare

Skills of what is now known as first aid have been recorded throughout history, especially in relation to warfare, where the care of both traumatic and medical cases is required in particularly large numbers. The bandaging of battle wounds is shown on Classical Greek pottery from c. 500 BCE, whilst the parable of the Good Samaritan includes references to binding or dressing

wounds.^[3] There are numerous references to first aid performed within the Roman army, with a system of first aid supported by surgeons, field ambulances, and hospitals.^[4] Roman legions had the specific role of *capsarii*, who were responsible for first aid such as bandaging, and are the forerunners of the modern *combat medic*.^[5]

Further examples occur through history, still mostly related to battle, with examples such as the *Knights Hospitaller* in the 11th century CE, providing care to pilgrims and knights in the Holy Land.^[6]

Formalization of life saving treatments

During the late 18th century, *drowning* as a cause of death was a major concern amongst the population. In 1767, a society for the preservation of life from accidents in water was started in Amsterdam, and in 1773, physician *William Hawes* began publicizing the power of *artificial respiration* as means of resuscitation of those who appeared drowned. This led to the formation, in 1774, of the Society for the Recovery of Persons Apparently Drowned, later the *Royal Humane Society*, who did much to promote resuscitation.^{[7][8]}

Napoleon's surgeon, *Baron Dominique-Jean Larrey*, is credited with creating an ambulance corps (the *ambulance volantes*), which included medical assistants, tasked to administer first aid in battle.

In 1859 *Jean-Henri Dunant* witnessed the aftermath of the *Battle of Solferino*, and his work led to the formation of the *Red Cross*, with a key stated aim of "aid to sick and wounded soldiers in the field".^[6] The Red Cross and Red Crescent are still the largest provider of first aid worldwide.^[9]

In 1870, *Prussian* military surgeon *Friedrich von Esmarch* introduced formalized first aid to the military, and first coined the term "erste hilfe" (translating to 'first aid'), including training for soldiers in the *Franco-Prussian War* on care for wounded comrades using pre-learnt bandaging and splinting skills, and making use of the *Esmarch bandage* which he designed.^[3] The bandage was issued as standard to the Prussian combatants, and also included aide-memoire pictures showing common uses.

Esmarch bandage showing soldiers how to perform first aid

In 1872, the *Order of Saint John of Jerusalem in England* changed its focus from hospice care, and set out to start a system of practical medical help, starting with making a grant towards the establishment of the UK's first ambulance service. This was followed by creating its own wheeled transport litter in 1875 (the *St John Ambulance*), and in 1877 established the *St John Ambulance Association* (the forerunner of modern-day *St John Ambulance*) "to train men and women for the benefit of the sick and wounded".^[10]

Also in the UK, *Surgeon-Major Peter Shepherd* had seen the advantages of von Esmarch's new teaching of first aid, and introduced an equivalent programme for the British Army, and so being the first user of "first aid for the injured" in English, disseminating information through a series of lectures. Following this, in 1878, Shepherd and *Colonel Francis Duncan* took advantage of the newly charitable focus of St John,^[3] and established the concept of teaching first aid skills to civilians. The first classes were conducted in the hall of the Presbyterian school in Woolwich (near Woolwich barracks where Shepherd was based) using a comprehensive first aid curriculum.

First aid training began to spread through the *British Empire* through organisations such as *St John*, often starting, as in the UK, with high risk activities such as ports and railways.^[11]

Aims

The primary goal of first aid is to prevent death or serious injury from worsening. The key aims of first aid can be summarized in three key points, sometimes known as 'the three Ps':^[12]

Preserve life

The overriding aim of all medical care which includes first aid, is to save lives and minimize the threat of death.

Prevent further harm

Prevent further harm also sometimes called **prevent the condition from worsening**, or **danger of further injury**, this covers both external factors, such as moving a patient away from any cause of harm, and applying first aid techniques to prevent worsening of the condition, such as applying pressure to stop a bleed becoming dangerous.

Promote recovery

First aid also involves trying to start the recovery process from the illness or injury, and in some cases might involve completing a treatment, such as in the case of applying a plaster to a small wound.

It is important to note that first aid is not medical treatment and cannot be compared with what a trained medical professional provides. First aid involves making common sense decisions in best interest of an injured person.

Key skills

Certain skills are considered essential to the provision of first aid and are taught ubiquitously. Particularly the "ABC"s of first aid, which focus on critical life-saving intervention, must be rendered before treatment of less serious injuries. ABC stands for *Airway*, *Breathing*, and *Circulation*.^[13] The same mnemonic is used by all emergency health professionals. Attention must first be brought to the airway to ensure it is clear. Obstruction (choking) is a life-threatening emergency. Following evaluation of the airway, a first aid attendant would determine adequacy of breathing and provide rescue breathing if necessary. Assessment of circulation is now not usually carried out for patients who are not breathing, with first aiders now trained to go straight to chest compressions (and thus providing artificial circulation) but pulse checks may be done on less serious patients.

In case of tongue fallen backwards, blocking the airway, it is necessary to hyperextend the head and pull up the chin, so that the tongue lifts and clears the airway.

Some organizations add a fourth step of "D" for *Deadly bleeding* or *Defibrillation*, while others consider this as part of the *Circulation* step simply referred as Disability. Variations on techniques to evaluate and maintain the ABCs depend on the skill level of the first aider. Once the ABCs are secured, first aiders can begin additional treatments or examination, as required if they possess the proper training (such as measuring pupil dilation)^[14]. Some organizations teach the same order of priority using the "3Bs": *Breathing*, *Bleeding*, and *Bones* (or "4Bs": *Breathing*, *Bleeding*, *Burns*, and *Bones*). While the ABCs and 3Bs are taught to be performed sequentially, certain conditions may require the consideration of two steps simultaneously. This includes the provision of both artificial respiration and chest-compressions to someone who is not breathing and has no pulse, and the consideration of cervical spine injuries when ensuring an open airway.

Preserving life

To save a person's life, you need to have an open airway so it makes a clear passage where air can go through the mouth or nose through the pharynx and down into the lungs, without obstruction. Conscious people will maintain their own airway automatically, but those who are unconscious (with a GCS of less than 8) may be unable to maintain a patent airway, as the part of the brain which automatically controls breathing in normal situations may not be functioning.

If the patient was breathing, a first aider would normally then place them in the recovery position, with the patient leant over on their side, which also has the effect of clearing the tongue from the pharynx. It also avoids a common cause of death in unconscious patients, which is choking on regurgitated stomach contents.

The airway can also become blocked through a foreign object becoming lodged in the pharynx or larynx, commonly called choking. The first aider will be taught to deal with this through a combination of 'back slaps' and 'abdominal thrusts'.

Once the airway has been opened, the first aider would assess to see if the patient is breathing. If there is no breathing, or the patient is not breathing normally, such as agonal breathing, the first aider would undertake what is probably the most recognized first aid procedure—CPR, which involves breathing for the patient, and manually massaging the heart to promote blood flow around the body.

If the choking person is an infant, the aide will give five strong blows in the infant's upper back by placing the infant's face down on his forearm. The aide will be taught not to provide first aid if the infant is able to cough or cry. Coughing and crying indicate the airway is open and the foreign object will likely to come out from the force the coughing or crying produce^[15]

The first responder also will be educated on how to perform CPR along with using Automatic External Defibrillation (AED) for a person who is having a sudden cardiac arrest. Survival rate in people who had cardiac arrest outside of hospital is low. The lack of oxygen supply to the brain for five minutes will cause permanent brain damage, so quick action is very important to save the person's life. AED is a device that examine a heartbeat and give shock to restart the heart. AEDs were developed to allow first responders to successfully deliver shocks after seeing diagrams and auditory instructions of the device^[16]

The first aider is also likely to be trained in dealing with injuries such as cuts, grazes or bone fracture. They may be able to deal with the situation in its entirety (a small adhesive bandage on a paper cut), or may be required to maintain the condition of something like a broken bone, until the next stage of definitive care (usually an ambulance) arrives.

Training

Basic principles, such as knowing to use an adhesive bandage or applying direct pressure on a bleed, are often acquired passively through life experiences. However, to provide effective, life-saving first aid interventions requires instruction and practical training. This is especially true where it relates to potentially fatal illnesses and injuries, such as those that require CPR; these procedures may be invasive, and carry a risk of further injury to the patient and the provider. As with any training, it is more useful if it occurs *before* an actual emergency, and in many countries, emergency ambulance dispatchers may give basic first aid instructions over the phone while the ambulance is on the way.

Training is generally provided by attending a course, typically leading to certification. Due to regular changes in procedures and protocols, based on updated clinical knowledge, and to maintain skill, attendance at regular refresher courses or re-certification is often necessary. First aid training is often available through community organizations such as the Red Cross and St. John Ambulance, or through commercial providers, who will train people for a fee. This commercial training is most common for training of employees to perform first aid in their workplace. Many community organizations also provide a commercial service, which complements their community programmes.

First-aid scenario training in progress

types of first aid which require training

There are several types of first aid (and first aider) which require specific additional training. These are usually undertaken to fulfill the demands of the work or activity undertaken.

- **Aquatic/Marine first aid** is usually practiced by professionals such as lifeguards, professional mariners or in diver rescue, and covers the specific problems which may be faced after water-based rescue or delayed MedEvac.
- **Battlefield first aid** takes into account the specific needs of treating wounded combatants and non-combatants during armed conflict.
- **Hyperbaric first aid** may be practiced by underwater diving professionals, who need to treat conditions such as decompression sickness.
- **Oxygen first aid** is the providing of oxygen to casualties who suffer from conditions resulting in hypoxia. It is also a standard first aid procedure for underwater diving incidents where gas bubble formation in the tissues is possible.
- **Wilderness first aid** is the provision of first aid under conditions where the arrival of emergency responders or the evacuation of an injured person may be delayed due to constraints of terrain, weather, and available persons or equipment. It may be necessary to care for an injured person for several hours or days.

- **Mental health first aid** is taught independently of physical first aid. How to support someone experiencing a mental health problem or in a crisis situation. Also how to identify the first signs of someone developing mental ill health and guide people towards appropriate help.

First aid services

Some people undertake specific training in order to provide first aid at public or private events, during filming, or other places where people gather. They may be designated as a **first aider**, or use some other title. This role may be undertaken on a voluntary basis, with organisations such as the Red Cross and St John Ambulance, or as paid employment with a medical contractor

People performing a first aid role, whether in a professional or voluntary capacity, are often expected to have a high level of first aid training and are often uniformed.

First aider of the British Red Cross accompanies parade of morris dancers at the Knutsford Royal May Day 2012

Symbols

Although commonly associated with first aid, the symbol of a red cross is an official protective symbol of the **Red Cross**. According to the **Geneva Conventions** and other international laws, the use of this and **similar symbols** is reserved for official agencies of the **International Red Cross and Red Crescent**, and as a protective emblem for medical personnel and facilities in combat situations. Use by any other person or organization is illegal, and may lead to prosecution.

The internationally accepted symbol for first aid is the white cross on a green background shown below.

Some organizations may make use of the **Star of Life**, although this is usually reserved for use by ambulance services, or may use symbols such as the **Maltese Cross**, like the **Order of Malta Ambulance Corps** and **St John Ambulance**. Other symbols may also be used.

ISO First Aid Symbol

Civil defence

Conditions that often require first aid

Also see *medical emergency*.

- Altitude sickness, which can begin in susceptible people at altitudes as low as 5,000 feet, can cause potentially fatal swelling of the brain or lungs.^[17]
- Anaphylaxis, a life-threatening condition in which the airway can become constricted and the patient may go into shock. The reaction can be caused by a systemic allergic reaction to allergens such as insect bites or peanuts. Anaphylaxis is initially treated with injection of epinephrine.
- Battlefield first aid—This protocol refers to treating shrapnel, gunshot wounds, burns, bone fractures, etc. as seen either in the 'traditional' battlefield setting or in an area subject to damage by large-scale weaponry, such as a bomb blast.
- Bone fracture, a break in a bone initially treated by stabilizing the fracture with a splint.
- Burns, which can result in damage to tissues and loss of body fluids through the burn site.
- Cardiac Arrest, which will lead to death unless CPR preferably combined with an AED is started within minutes. There is often no time to wait for the emergency services to arrive as 92 percent of people suffering a sudden cardiac arrest die before reaching hospital according to the American Heart Association.
- Choking, blockage of the airway which can quickly result in death due to lack of oxygen if the patient's trachea is not cleared, for example by the Heimlich Maneuver.
- Childbirth.
- Cramps in muscles due to lactic acid build up caused either by inadequate oxygenation of muscle or lack of water or salt.
- Diving disorders, drowning or asphyxiation.^[18]
- Gender-specific conditions, such as dysmenorrhea and testicular torsion.
- Heart attack, or inadequate blood flow to the blood vessels supplying the heart muscle.
- Heat stroke, also known as sunstroke or hyperthermia, which tends to occur during heavy exercise in high humidity, or with inadequate water, though it may occur spontaneously in some chronically ill persons. Sunstroke, especially when the victim has been unconscious, often causes major damage to body systems such as brain, kidney, liver, gastric tract. Unconsciousness for more than two hours usually leads to permanent disability. Emergency treatment involves rapid cooling of the patient.
- Hair tourniquet a condition where a hair or other thread becomes tied around a toe or finger tightly enough to cut off blood flow.
- Heat syncope, another stage in the same process as heat stroke, occurs under similar conditions as heat stroke and is not distinguished from the latter by some authorities.
- Heavy bleeding, treated by applying pressure (manually and later with a pressure bandage) to the wound site and elevating the limb if possible.
- Hyperglycemia (diabetic coma) and Hypoglycemia (insulin shock).
- Hypothermia, or Exposure, occurs when a person's core body temperature falls below 33.7 °C (92.6 °F). First aid for a mildly hypothermic patient includes rewarming, which can be achieved by wrapping the affected person in a blanket, and providing warm drinks, such as soup, and high energy food, such as chocolate.^[19] However, rewarming a severely hypothermic person could result in a fatal arrhythmia, an irregular heart rhythm.^[20]
- Insect and animal bites and stings.
- Joint dislocation.
- Poisoning, which can occur by injection, inhalation, absorption, or ingestion.
- Seizures, or a malfunction in the electrical activity in the brain. Three types of seizures include a grand mal (which usually features convulsions as well as temporary respiratory abnormalities, change in skin complexion, etc.) and petit mal (which usually features twitching, rapid blinking, or fidgeting as well as altered consciousness and temporary respiratory abnormalities).
- Muscle strains and Sprains, a temporary dislocation of a joint that immediately reduces automatically but may result in ligament damage.
- Stroke, a temporary loss of blood supply to the brain.
- Toothache, which can result in severe pain and loss of the tooth but is rarely life-threatening, unless over time the infection spreads into the bone of the jaw and starts osteomyelitis.
- Wounds and bleeding, including lacerations, incisions and abrasions, Gastrointestinal bleeding, avulsions and Sucking chest wounds, treated with an occlusive dressing to let air out but not in.

Many accidents can happen at home, office, schools, laboratories etc. which require immediate attention before the patient is attended by the doctor.

First aid kits

A first aid kit consists of a strong, durable bag or transparent plastic box. They are commonly identified with a white cross on a green background. A first aid kit does not have to be bought ready-made. The advantage of ready-made first aid kits are that they have well organized compartments and familiar layouts.

Contents

There is no universally agreed upon list for the contents of a first aid kit. The UK Health and Safety Executive stress that the contents of workplace first aid kits will vary according to the nature of the work activities^[21]. As an example of possible contents of a kit, British Standard "BS 8599 First Aid Kits for the Workplace"^[22] lists the following items:

- Information leaflet
- Medium sterile dressings
- Large sterile dressings
- Triangular dressings
- Safety pins
- Adhesive dressings
- Sterile wet wipes
- Microporous tape
- Nitrile gloves
- Face shield
- Foil blanket
- Burn dressings
- Clothing shears
- Conforming bandages
- Finger dressing

Introduction to First Aid

By Thomas G. Parker, In Medicine

First aid is the immediate care given to a person who has been injured or suddenly taken ill. It includes self-help and home care if medical assistance is not available or is delayed. It also includes well-selected words of encouragement, evidence of willingness to help, and promotion of confidence by demonstration of competence.

The person giving first aid, the first-aider, deals with the whole situation, the injured person, and the injury or illness. He knows what not to do as well as what to do; he avoids errors that are frequently made by untrained persons through well-meant but misguided efforts. He knows, too, that his first aid knowledge and skill can mean the difference between life and death, between temporary and permanent disability, and between rapid recovery and long hospitalization.

NEED FOR FIRST AID TRAINING

Statistics show that accidents are the leading cause of death among persons from 1 year old to 38 years old; thereafter, accidents are one of the leading causes. The annual cost of medical attention, the loss of earning ability due to temporary or permanent impairment, the direct property damage, and the insurance costs amount to many billions of dollars each year, not to mention the toll in pain, suffering, disability, and personal tragedy.

Added to the grim accident statistics is the fact that the pattern of medical care has changed. Individuals today require, and should demand, the best possible care. Equipment for diagnosis and treatment, which is needed to provide such care, is usually at a hospital. Moreover, the growing population and expanding health needs have not been balanced by a proportional increase in numbers of doctors, nurses, and allied health workers. It is not enough to say, "Call the doctor"; a doctor may not be available to come to the scene of the emergency.

First aid training is of value in both preventing and treating sudden illness or accidental injury and in caring for large numbers of persons caught in a natural disaster.

Self-Help

If you, as a first-aider, are prepared to help others, you are better able to care for yourself in case of injury or sudden illness. Even if your own condition keeps you from caring for yourself, you can direct others in carrying out correct procedures to follow in your behalf.

Help for Others

Having studied first aid, you are prepared to give others some instruction in first aid, to promote among them a reasonable safety attitude, and to assist them wisely if they are stricken. There is always an obligation on a humanitarian basis to assist the stricken and the helpless. There is no greater satisfaction than that resulting from relieving suffering or saving a life.

Preparation for Disaster

First aid training is of particular importance in case of catastrophe, when medical and hospital services are limited or delayed. Catastrophe may take the form of a hurricane, a flood, an earth-quake, a tornado, an explosion, or a fire. It may also take the form of a single accidental death or a life-threatening illness. Knowing what to do in an emergency helps to avoid the panic and disorganized behavior that are characteristic of unprepared persons at such times. Knowledge of first aid is a civic responsibility. It not only helps to save lives and prevent complications from injuries but also helps in setting up an orderly method of handling emergency problems according to their priority for treatment, so that the greatest possible good may be accomplished for the greatest number of people.

Safety Awareness

First aid training not only provides you with knowledge and skill to give life support and other emergency care but also helps you to develop safety awareness and habits that promote safety at home, at work, during recreation, and on the streets and highways. In the promotion of safety awareness, it is important to closely relate three terms: cause, effect, and prevention.

WHAT YOU HAVE LEARNT

Notes

TERMINAL EXERCISES

1. Explain with examples what you understand by the term 'energy'.
2. Give two examples each of renewable and non-renewable sources of energy in your locality.
3. List five suggestions you would give a housewife to conserve energy in her home.

As various types of injury and illness are studied, initially only the more likely causes are identified, mainly because of the diversity of circumstances that are present in most accident situations. Aside from the more likely and obvious causative conditions, there are related human and mechanical factors to consider, as well as factors beyond the control of man.

A primary consideration in determining the root cause of an accident is human failure: an act of thoughtless, careless, or unwise behavior. Human failure may involve an act of doing something—or perhaps not doing something. It can create danger to oneself as well as to others. A person may wantonly disobey some regulation or law that has been established for safety. People often fail to heed warnings and follow directions. Instruction in the safe use of an object or in safe conduct may be inadequate; supervision during the learning process may be ignored. Human failure can also involve such mental or physical conditions as fatigue, inattention, impatience, and structural or functional handicaps of the body.

The possibility of mechanical malfunctions or structural failures as contributing causes of accidents also requires consideration. Faulty design or engineering may create a built-in hidden hazard. Manufacturing or construction procedures could lack the quality control necessary to ensure safe performance or use. The raw material may contain some inordinate defect.

When the in-depth study of an actual or hypothetical accident situation identifies all the causative factors, it becomes possible to determine what can be done to eliminate, control, or avoid the hazards.

Effect

The immediate effects of an injury or sudden illness consist of changes in the body's structure and functions. These effects are dealt with in the material on first aid care, particularly in discussions of signs and symptoms. However, long-range—possibly permanent—effects are also involved in many situations. Permanent disability can make it difficult for a person to enjoy a fully active and productive life. The economic and social structure of the family unit is frequently disrupted. In an accident, mental anguish brought on by knowing that one may have contributed to another's death or disability can linger on through a lifetime.

When analysis carefully considers both immediate and long-range or permanent effects of

We use cookies to give you the best experience. If you do nothing we'll assume that it's ok.

Notes

- Decentralization of power production and supply eases pressure on the larger power projects.

4. Wind Energy

Man has been using wind energy since a long time now - to sail boats on water, to grind grain by setting up wind mills, etc. Now, growing technological advancement has made it possible to generate electricity by using wind power. Let us see how this is done. A very simple structure consisting of blades or propellers and a direction controller is mounted on a high tower. The wind machine is fixed in an open area. When the wind blows, the propellers rotate and generate electricity in the generator to which they are connected.

The amount of energy generated depends upon the wind speed. A two fold increase in wind speed results in an eight fold increase in energy produced. It is estimated that an average wind speed of 20km/hr is essential for economical electricity production whereas a windspeed of 10km/hr is sufficient to work windpumps.

Some of the advantages of using wind energy are:

- it is absolutely free and non-polluting
- it can be used to generate and supply electricity in geographically isolated or hilly areas
- wind machines are cheap to set up and maintain.

Be Non-conventional!

What are the advantages of using the non-conventional sources of energy?

1. There is a never-ending supply.
2. These are easily available.
3. Production and use of non-conventional energy is always pollution free and leaves the environment clean.
4. These are locally produced. Hence there is low cost of distribution.
5. Energy production units can be started on a small scale. Hence, heavy investment is not required.
6. Job opportunities for the local people are opened up.

INTEXT QUESTIONS 14.6

1. What is the difference between a big hydro-electric project and micro hydel project?
2. List five benefits of setting up a micro hydel project.
3. State the advantages of using non-conventional sources of energy.

Prevention

A better understanding of the overall accident problem is developed if all the circumstances surrounding various types of accidents are carefully studied, including the broad range of first aid care that may be required. With such understanding, a person is likely to think and act more carefully, thoughtfully, and wisely. He tends to become more concerned for his own personal safety, as well as for that of others. He is likely to become genuinely interested in creating a safer environment on the highway, in the home, at work, in school, and at play. He will have a more responsible attitude toward accident prevention.

The causes of an accident indicate what accident-producing conditions and activities require attention. Accident effects indicate why such conditions and activities deserve concerted attention. Preventive measures should include a consideration of how these conditions and activities can be eliminated, controlled, or avoided.

GENERAL DIRECTIONS FOR FIRST AID

As a first-aider, you may encounter a variety of problem situations. Your decisions and actions will vary according to the circumstances that produced the accident or sudden illness, the number of persons involved, the immediate environment, and the availability of medical assistance, emergency dressings and equipment, and help from others. You will need to adapt what you have learned to the situation at hand or will need to improvise.

Sometimes, prompt action is needed to save a life. At other times, there is no need for haste. Efforts in the latter case will be directed toward preventing further injury, obtaining assistance, and reassuring the victim, who may be emotionally upset and apprehensive, as well as in pain.

First aid begins with action, which in itself has a calming effect. If there are multiple injuries or if several persons are hurt, priorities must be set. If you are the first-aider in charge you should enlist the help of bystanders to make telephone calls, to direct traffic, to keep others at a distance if necessary, to position safety flares in case of highway accidents, and so on. You should provide life support to victims with life-threatening injuries, attending first to those suffering from stoppage of breathing and then to those with severe hemorrhaging. You can then turn to those with less critical injuries.

Notes

(c) **Solar heating** - Heat energy from the sun is being used in various ways today. It is used to:

- Heat water for bathing purposes in home, hotels and hostels
- Provide central heating in homes, hotels and hostels
- Make salted water fit for drinking purpose
- Dry timber, crops and fish in solar furnaces
- Provide refrigeration in small, specially designed refrigerators. These are specially useful in keeping life-saving drugs at a low temperature and in preserving perishable agricultural produce like fruits and vegetables and milk and its products.

**INTEXT QUESTIONS 14.5**

1. List at least four advantages of using non-conventional sources of energy.
2. Name the chief constituent of biogas.
3. List two uses of biogas.
4. Name the device used to transform daylight to electrical energy.

3. Hydel Energy

'Hydel' refers to water. Surely, all of you must have heard of big hydroelectric projects in our country like Bhakra-Nangal Project or the Damodar Valley Corporation (DVC), etc. These are enormous projects set up at the cost of crores of rupees and they generate lots of electricity. With the growing demand for electricity, the need to set up more such projects is being felt. But since most of the major sites on the big rivers have already been used for the purpose, there is very little scope of setting up more big projects. Then, what is the alternative? We have to now devise and set up microhydel projects.

It is realised that a small quantity of water falling from a great height can produce as much power as a large quantity of water falling from a much shorter height. Thus, the smaller rivers can be used to set up microhydel projects. The advantages of installing such micro projects are:

- They do not require heavy investment on installation.
- They are comparatively easy to maintain.
- They can be set up to supply electricity locally to geographically far flung areas which are not covered by the national grid system.
- Local supply of electricity reduces cost of distribution.

telephone or have someone else telephone the appropriate authorities regarding the accident. The police department or the high-way patrol is a good first contact, but the circumstances surrounding the accident should be a guide as to whom to call. You should always have a list of emergency telephone numbers available. If the numbers are not readily available, ask the operator for assistance. Describe the problem, indicate what is being done, and ask for whatever help you think is needed, such as an ambulance, the fire department, the rescue squad, or utility company personnel. Give your name, the location of the accident, the number of persons involved, and the telephone number where you can be reached. Do not hang up the receiver until after the other party hangs up, because he may wish to clarify some information.

Urgent Care

In case of serious injury or sudden illness, and while help is being summoned, you must immediately—

- Determine the best way of rescue (for example, removal of an accident victim from water, from a fire, or from a garage or room containing carbon monoxide or smoke).
- Ensure that the victim has an open airway and give mouth-to-mouth or mouth-to-nose artificial respiration if it is necessary.
- Control severe bleeding.
- Give first aid for poisoning or ingestion of harmful chemicals.

Specific emergencies that require immediate first aid will be discussed in the appropriate chapters in the text.

Additional First Aid Directions

Unless it is necessary for safety to move a victim at once, keep him in the position best suited to his condition or injuries. Do not let him get up or walk around. Protect him from aggravation of existing injuries. If blankets or covers are available, keep him warm enough to overcome or avoid chilling. If he is exposed to cold or dampness, place blankets or additional clothing over and under him.

available to mankind for centuries but it is only recently that technological advancements have been made to trap and effectively utilise this energy. Some of the ways in which solar energy is being used today are:

(a) **Solar cooker** - This is a shallow, square box with black sides and bottom and a glass top. When the black bottom is hit by sunlight passing through the glass top, it gets heated up. When food is kept inside the box, it gets cooked by this heat.

Fig. 14.7: Solar cooker

Some advantages of using a solar cooker are:

- Fuel cost is reduced. Regular use preserves an average of 2 kg of combustible wood per day!
- It is totally safe to use - there is no fire, no leaking gas and no electric shocks
- It does not require constant attention.
- It can cook up to four dishes at a time.
- It is very easy to use.

Use a solar cooker to cook your family's meal!

(b) **Solar lighting** - Ordinary daylight is transformed to electrical energy with the help of solar cells. These solar cells produce electricity according to the amount of sunlight falling on them. When chemical storage batteries are used along with these cells, the excess energy produced on sunny days is stored for use on cloudy days.

Fig. 14.8 Solar panels

Solar cells are used to produce lighting in

- (i) Streets
- (ii) Homes
- (iii) Neon sign for advertising

Is there an alternative? Yes, there certainly is! You have already studied that energy is renewable and non-renewable. If we want to stretch our non-renewable sources of energy we have to supplement them with the renewable sources.

Do you remember which are the renewable sources of energy? Since the use of these sources is not widely prevalent today, we also refer to them as non-conventional sources of energy. The non-renewable sources of energy are also known as the conventional sources of energy.

14.7 ENERGY OPTIONS FOR THE FUTURE

1. Biogas

Biogas is a product of fermentation of animal manure in the absence of air. It chiefly consists of methane gas which can safely be used as a fuel for cooking, as well as lighting.

Fig. 14.6 Biogas : The cheap and healthy fuel.

Ordinarily, a small biogas plant fed by the manure of 2-3 animals can produce enough gas for the daily cooking and lighting needs of a family of four persons. In addition, biogas can be used to pump water or run small motors of less horsepower.

Some other advantages are:

- The sludge or digested waste is an excellent fertilizer and increases the yield of crops and vegetables.
- It keeps the environment around the house clean since all animal manure is fed into the biogas plant.
- It prevents eye and lung diseases caused due to smoke from firewood.
- It conserves forests because wood is no longer used as fuel.
- It generates employment to masons and labourers needed to set up more biogas plants.

2. Solar Energy

Solar energy is available free of cost and is absolutely non-polluting. It has been

नाशिक
सोमवार, १३ ऑगस्ट २०१८

नाशिक : वाघ महाविद्यालयात संगणक फोरमच्या उद्घाटनप्रसंगी बोलताना शिरीष पांडे. सम्मवेत डॉ.व्ही. एम.सेवलीकर, प्राचार्य डॉ.ए.पी.राजपूत, प्रा.अर्चना बेंडाळे, प्रा. विजयश्री बावा, प्रा.पवन मालानी आदी.

वाघ महाविद्यालयात संगणक फोरमचे उद्घाटन

नाशिक : प्रतिनिधी

मुंबई-आग्रा महामार्गावरील सरस्वती नगर येथील के.के.वाघ कला, वाणिज्य, विज्ञान व संगणक विज्ञान महाविद्यालयामध्ये संगणक फोरमचे उद्घाटन झाले. याप्रसंगी रॅड हॅट अकॅडमीचा शिरीष पांडे यांनी 'ओपन सोर्स टेक्नॉलॉजी' या क्षेत्रातील विविध करिअर संधीबद्दल अनमोल मार्गदर्शन केले.

शाबेळी महाविद्यालयाचे मुंबईतील ए.पी.ए.सी.लीड रॅड हॅट अकॅडमीसोबत सामंजस्य करार करण्यात आला आहे. संगणक फोरम विषयी सरस्वतीनगर कॅम्पसचे समन्वयक डॉ.व्ही.एम.सेवलीकर, प्राचार्य डॉ.ए.पी.राजपूत यांनी

मार्गदर्शन केले. संगणक फोरमच्या माध्यमातून वर्षभर विद्यार्थ्यांसाठी विविध उपक्रम राबविण्यात येणार आहे. जेणे करून विद्यार्थ्यांना भविष्यात रोजगाराच्या संधी देखील उपलब्ध होऊ शकतात.

महाविद्यालयातर्फे विद्यार्थ्यांच्या सर्वांगीण विकासासाठी विविध प्रकारचे उपक्रम घेण्यात येतात. त्याचाच एक भाग म्हणून संगणक फोरमची स्थापना करण्यात आली आहे. याप्रसंगी विभागाप्रमुख प्रा.अर्चना बेंडाळे, प्रा. विजयश्री बावा उपस्थित होते. प्रा.पवन मालानी यांनी आभार मानले. कार्यक्रमास प्राध्यापक, कर्मचारी व विद्यार्थी उपस्थित होते.

Date:-19/12/2018

Notice

All Students of Science faculty are here by informed that "Wine Technology" course in will be conducted in our college by Science Dept.

Course Schedule:-

Date:- 27/12/2018 to 22/01/2019 Time :- 10:40 am to 01:40 pm

Venue:- Biotechnology Lab-II

Co-ordinator:- Ms. Damini Karsale

The duration of course is of 1 month & course lectures will be conducted on Thursday & Saturday of every week. Certificates will be issued after completion of Course. So interested students can register their names to the respective co-ordinator.

Last date of registration is 24/12/2018.

Ms. Damini Karsale
Course Co-ordinator

Mrs. A.R.Kote
HOD (Science)

Mrs.A.H.Bendale

Wine technology

| Sr. No. | Topics | Letures |
|---------|--|---------|
| 1 | Introduction to wine technology: What is wine technology and history. | 1 |
| 2 | Production of Wine A. Variety of Grapes B. Harvesting, Grading and C. Sorting, weighing, crushing and pressing, D. Chaptlization, Adjustment of pH E. Addition of preservative, F. Addition of wine yeast, G. Fermentation, H. Sulphurilization I. Filtration, Racking, Fining, Blending, J. Maturation, K. Pateurization L. Bottling and storage. | 4 |
| 3 | Types of Wines | 1 |
| 4 | Tasting | 2 |

Wine Technology

1970's - Georgia

→ 1st → China 6000 BC.
Alcoholic drinks were made from
fermented honey & fruits.

↓
Georgia → Used same techniques but with
Grapes &.

↓
3000 BC → Egypt → they may have done 1st
fermentⁿ process as they have used
wine jugs & labelled them with their
name & year.

↓
200 AD → Romans began to transport the wine in
wooden barrels.

↓
Around 1000 AD → The 'Chateau de Goulaine' was
built in France its the 1st family
owned business & Winery. (oldest)

↓
1600 AD → Researches started using "corks" & of
good quality bottles for wine making.
↳ allowed wine to store for long "duration".

↓
1830 → 1st modern wine bottle was manufactured.

↓
1864 → "Louis Pasteur discovered that Yeast
is responsible for the process of fermentⁿ of
wine prodⁿ."

* Variety of Grapes used

→ 7 types used for Red Wine.

→ Syrah (Shiraz)

→ Merlot

→ Cabernet Sauvignon

→ Malbec

→ Pinot Noir

→ Zinfandel

→ Sangiovese

→ Syrah → Australia / California & Rhone Valley of France

Shiraz Grapes is noted for its ability to produce hearty, spicy, deep wines of intensity & longevity.

→ Merlot → Grape variety grown throughout the world including in the Bordeaux region of France | Italy | California | S. America & Aust

→ Cabernet Sauvignon → widely used blend It grows throughout France | Aust | California & S. America.

* White Wine

→ Vitis Vinifera - Common Grape Vine

Native to Mediterranean region
Central Europe & South western Asia
from Morocco & Portugal, Germany & Iran.

→ Around 5000 - 10,000 varieties of Vitis vinifera.
Grow around 32m in length.
Leaves are around 5-20cm long & broad
(6mm fruit)

* Vitis labrusca →

→ fox grapes

Native to Eastern North America

Have slippery skin & is easy to remove while
processing. (pulp crushing).

* Vitis Rotundifolia → / Muscadine

Grapevine native to southeastern &
south central U.S from Florida to
Delaware, west to eastern Texas & Oklahoma.

Cultivated from 16th century.

→ Berries from bronze to dark purple to black color
when ripe.

→ Skin is thick.

→ Used mainly in artisan wines, juice & jelly

A]. HARVESTING OF GRAPES.

Generally August, Sept & Oct prime time for annual grape harvest for most vineeries in Europe & No America, Aust, N. Zealand, S America & S Africa.

Feb-April → regions below the equator

Depends on Growing season, grape ripeness & various vintage factors.

Late

Grapes are sometimes left on vine to rise sugar content & may be harvested up to a few months after traditional harvest

Sparkling wine

IQAC TRAINERS ALMA MATER

1.010 1.2.3 Average percentage of students enrolled in subject related Certificate/ Diploma /Add-on programs as against the total number of students during the last five years. (10)

Data Requirement:

- Total number of students enrolled in certificate diploma /Add-on Programs
- Total number of students across all the programs.

Percentage per year = Total number of students enrolled in certificate and Diploma Programs / total number of students across all programs. X 100

Average percentage = \sum Percentages per year / 5

Data Collection;

Data to be collected from

3. Principal & Vice Principals

- Copies of LMC reports where these courses have been sanctioned
- Program codes, Program names, Course codes, year of starting the course, course fees sanctioned.
- Infrastructural supports committed for the course
- Amounts sanctioned for the course conducting the course.
- Account details and amounts deposited for the courses.
- Details of agreements, MoU's with organizations participating in such courses.

4. Details from the course coordinators:

- Proposal copy to the management to conduct the course.
- Sanction letter from the management stating details such as duration, amount, and infrastructure sanctioned.
- Syllabus copy
- Details of the course conducted, program copy, time table, number of participants, attendances, course material, expenses, etc.
- Number of times the course has been conducted.
- Advertising and related news.
- Feedbacks from the participants are important.
- Meetings by the department to conduct this course.
- Report of the conducted program to the LMC and its mention in the minutes.
- Uploaded copies of courses on the website.

IQAC TRAINERS ALMA MATER

^{1.015} 1.3.1 Institution integrates cross cutting issues relevant to Gender, Environment and Sustainability, Human Values and Professional Ethics into the Curriculum (10)

Upload a description of courses which address Gender, Environment and Sustainability, Human Values.

Data required from each Department and teacher:

| Program Code, | Program Specific Code | Name Of The Course | Chapters And Topics Areas For Above Mentioned Topics | Enrichment Done By Teacher |
|---------------|-----------------------|--------------------|--|----------------------------|
| | | | | |
| | | | | |
| | | | | |
| | | | | |

*areas of enrichment done should be detailed.

IQAC TRAINERS ALMA MATER

1.020 1.3.2 Number of value added courses imparting transferable and life skills offered during the last five years (15)

Data Requirement:

- Names of the value added courses with 30 or more contact hours
- No. of times offered during the same year
- Total no. of students completing the course in the year.

| Program code | Program name | Course code | Name of the Certificate diploma introduced in last 5 years | Year of introduction |
|--------------|--------------|-------------|--|----------------------|
| | | | | |
| | | | | |
| | | | | |
| | | | | |
| | | | | |

Data to be collected from

5. Principal & Vice Principals

- Copies of LMC reports where these courses have been sanctioned
- Program codes, Program names, Course codes, year of starting the course, course fees sanctioned.
- Infrastructural supports committed for the course
- Amounts sanctioned for the course conducting the course.
- Account details and amounts deposited for the courses.
- Details of agreements, MoU's with organizations participating in such courses.

6. Details from the course coordinators:

- Proposal copy to the management to conduct the course.
- Sanction letter from the management stating details such as duration, amount, and infrastructure sanctioned.
- Syllabus copy.
- Details of the course conducted, program copy, time table, number of participants, attendances, course material, expenses, etc.
- Number of times the course has been conducted.
- Advertising and related news.
- Feedbacks from the participants are important.
- Meetings by the department to conduct this course.
- Report of the conducted program to the LMC and its mention in the minutes.
- Uploaded copies of courses on the website.

NOTICE

All Students of Science faculty are here by informed that Science Dept. is scheduled for "Personal Hygiene" course. The course will start from 2nd Sep 2017. The duration of course is of 1 month & course lectures will be conducted on Friday & Saturday of every week.

Certificates will be issued after completion of course. So interested students can register their names to the course coordinator.

The course details are as follows:-

Date:- 2nd Sep 2017 to 30th Sep 2017

Time:- 10:15am to 01:30pm

Venue:- Microbiology Lab-I

Course Co-ordinator: - Dr. Sharada Patil

Last date of registration is 29th Dec 2017

❖ Creating a Personal Hygiene Routine: Tips and Benefits

Q. What is personal hygiene?

Personal hygiene is how you care for your body. This practice includes bathing, washing your hands, brushing your teeth, and more.

Every day, you come into contact with millions of outside germs and viruses. They can linger on your body, and in some cases, they may make you sick. Personal hygiene practices can help you and the people around you prevent illnesses. They can also help you feel good about your appearance.

Learn more about why hygiene is so important, the best ways to practice it, and how you can change your habits to make yourself feel and look better.

Types of personal hygiene

Each person's idea of personal hygiene differs. These main categories are a useful place to start for building good hygiene habits:

Toilet hygiene

Wash your hands after you use the restroom. Scrub with soap for 20 to 30 seconds, and be sure to clean between your fingers, on the back of your hands, and under your nails. Rinse with warm water, and dry with a clean towel.

If you don't have running water or soap, an alcohol-based hand sanitizer will also work. Use one that's at least 60 percent alcohol.

Shower hygiene

Personal preference may dictate how often you wish to shower, but most people will benefit from a rinse at least every other day. Showering with soap helps rinse away dead skin cells, bacteria, and oils.

when you handle
before

You should also wash your hair at least twice a week. Shampooing your hair and scalp helps remove skin buildup and protects against oily residues that can irritate your skin.

Nail hygiene

Trim your nails regularly to keep them short and clean. Brush under them with a nail brush or washcloth to rinse away buildup, dirt, and germs.

Tidying your nails helps you prevent spreading germs into your mouth and other body openings. You should also avoid biting your nails.

Teeth hygiene

Good dental hygiene is about more than just pearly white teeth. Caring for your teeth and gums is a smart way to prevent gum diseases and cavities.

Brush at least twice a day for 2 minutes. Aim to brush after you wake up and before bed. If you can, brush after every meal, too. Floss between your teeth daily, and ask your dentist about using an antibacterial mouthwash.

These two steps can help prevent tooth decay and eliminate pockets where bacteria and germs can build up.

Sickness hygiene

~~If you're not feeling well, you should take steps to keep from spreading germs to others. This includes covering your mouth and nose when sneezing, wiping down shared surfaces with an antibacterial wipe, and not sharing any utensils or electronics. Also, immediately throw away any soiled tissues.~~

Hands hygiene

Germs on your hands can easily enter your body through your mouth, nose, eyes, or ears. Wash your hands:

- scalp helps
- when you handle food
 - before you eat
 - if you handle garbage
 - when you sneeze
 - any time you touch an animal

Likewise, wash your hands after changing a baby's diaper, helping someone clean themselves, or when cleaning a cut or wound.

Personal hygiene for kids

Good personal hygiene will help your kids stay healthy, ward off illnesses, and build better self-awareness.

It's never too early to start teaching hygiene. You can wipe down your child's hands after changing their diapers or before eating, brush their teeth and gums before bed, and get them into a daily bath routine. This helps you begin the process and slowly teaches them as they grow and take over the process.

Here's a list of hygiene activities, how you can introduce them, and when is a good time to start:

Brushing teeth

You can begin brushing your baby's teeth and gums the moment the first tooth pops up. They can brush their own teeth by about 3 years old. However, you may have to stay with them to guarantee they're doing a good job and brushing long enough.

Play a 2-min. song when it's time to brush teeth. That will let your little one know how long they have to brush, and they'll get used to the process. Likewise, you may have to continue flossing for them until they're older and can handle that task better, around age 7.

Bathing

You'll be giving your baby baths regularly, but by about age 5, they should be able to handle this task on their own. As they're growing and you're supervising bath time, you should take the opportunity to teach about washing all the different body parts, especially:

- armpits
- groins
- neck
- belly
- knees
- elbows
- back
- feet

You can also use this time to teach them how to wash their hair without getting suds in their eyes — and what to do if they do.

Hand washing

Wipe your baby's hands with a warm washcloth before mealtime, after eating, and after changing a diaper. During potty training, make washing hands an integral step in the process.

You can teach your child to sing the ABC song while they wash — it's 20 seconds long, which is an ideal washing time.

Make it a priority to ask your child to wash their hands any time you'd like to encourage good hygiene, like before meals, after playing outside, after petting an animal, or after being near a sick friend.

Nail hygiene

You'll clip your child's nails when they're a baby, but as they grow older, you can help them care for their own nails. Encourage your children to wash under their nails at each shower — a

able to handle this
take the

A nail brush will help. Then, sit down with them weekly after a shower for a trim. Your nails are softer and clip more easily after a shower.

By age 7, most children should be up for the task alone.

❖ Side effects of poor personal hygiene

Good personal hygiene habits are directly related to less illnesses and better health. Poor personal hygiene habits, however, can lead to some minor side effects, like body odor and greasy skin. They can also lead to more troublesome or even serious issues.

For example, if you don't wash your hands frequently, you can easily transfer germs and bacteria to your mouth or eyes. This can lead to any number of issues, from stomach viruses to pink eye.

Not brushing your teeth can lead to teeth issues and plaque buildup. Poor dental care is also a risk factor for several serious health issues, including heart disease.

Poor hygiene habits can also affect your self-esteem. Looking and feeling presentable can give you a confidence boost and a sense of pride in your appearance.

Other conditions may be prevented or the risk minimized by practicing good personal hygiene. These are some examples:

- scabies
- pubic lice
- head lice
- body lice
- diarrhea
- athlete's foot
- ringworm
- pinworms

- swimmer's ear
- hot tub rash

Creating a personal hygiene routine

If you want to improve your personal hygiene or help a child develop better habits, these strategies might be helpful:

Set reminders

If you can't remember to do things like shower, wash your hair, clip your nails, or brush your teeth, set a reminder on your phone. The cue will push you to the activity, and over time, you'll begin to do it yourself.

Use signs

Hang a reminder in the bathroom to wash your hands after using the toilet. Put a little sign by the plates or bowls in the kitchen to cue yourself to wash your hands before eating. These signs can help jog your memory and improve your habits. They can help both you and your children.

Practice makes perfect

It takes time to learn a new habit. Start with a new habit at the beginning of the week and make it your priority. Practice it for a week or two. When you feel comfortable with it, add a new one. Over time, you'll establish the habits you wish to have.

Dear Prof. Nandurkar,

Greetings from the Mahindra Pride Schools!!

At the outset, we would like to thank you for meeting us and agreeing to implement our skill based training program in your college.

We are attaching the brochure which gives you some information about the work we have been doing in this sector since 2007 in our in-center programs.

Mahindra Pride Schools are now stepping out of their campus and into yours to create a larger impact

We look forward to working with your students and will be in touch with you soon.

Please acknowledge receipt of this email.

Thanks,

Regards,

Nishigandha Mathur

❖ Effective PowerPoint Presentation Tips (To Improve Your Skills)

The best PowerPoint presentations shouldn't be remembered. Instead, they should fall into the background to support you and the message you're trying to get across.

What *does* stand out as a distraction is a bad PowerPoint presentation. Whether it's a million lines of text, a disjointed flow, ugly photos, or poor design, bad PowerPoints detract from the message you're trying to get across (while also undermining your own credibility as a professional or speaker).

This article will take you from your initial topic through to how to make an effective PowerPoint presentation—covering everything in between. You'll learn how to present a PowerPoint like a pro.

These Microsoft PowerPoint presentation tips and guidelines are organized into sections. So, you can cut straight to the advice you need and come back when you're ready for the next steps. You're about to see the best PowerPoint tips and tricks.

What Makes a PowerPoint Presentation Effective?

Knowing how to use PowerPoint and work within it quickly is helpful. But more important is making a good presentation that hits all your goals and delivering it effectively. A great PowerPoint presentation is:

- **Prepared to Win.** Researched, planned, and prepared professionally, so you can deliver the right message to **your target audience effectively**.
- **Designed Correctly.** With points that are illustrated and visually stand out without overwhelming your audience or unnecessarily complicating your message.
- **Practiced to Perfection.** Rehearsed and timed so your points land as practiced with your live audience.
- **Delivered with Poise.** Presented **with a relaxed inner-calm and confident outward projection**, while communicating warmth, excitement, and energy.
- **Free from Mistakes.** Devoid of cheesy clip art, nonessential flashiness, miscues like reading directly from promoters, and other easy to avoid problems.

Consider this your all-inclusive guide of how to make a good presentation PPT. We'll look at preparing your presentation, how to design it in PowerPoint, as well as how to practice and nail your delivery successfully come presentation time.

We'll also address what not to do in these tips for PowerPoint presentations—so you can sidestep any big mistakes.

Simple Tips to Design Your PowerPoint Presentation Better

Before even opening PowerPoint, start by addressing these things. These Microsoft PowerPoint tips and tricks will ensure that you're fully prepared for your presentation:

1. Know Your Stuff

Your presentation isn't about your slides alone. It's about the message you want to get across. Before filling in stats, facts and figures, think about the narrative that'll be discussed, why and in what order. It's a must as you learn how to give a good presentation PPT.

2. Write it Out

Start on a Word or Google doc, and storyboard or script the entire presentation to give you an idea of how the information presented will flow, and how viewers will see it in sequence. Learn the complete writing process:

3. Highlight What's Most Important

A presentation covers the most crucial pieces only. Whatever you've been working on that lead to this—a paper, a work project, a new product design—doesn't need to be shared in its entirety. Pick key points and put the rest in an "Appendix" to refer to during the Q&A session at the end.

4. Know Your Audience

How you talk to a room full of medical professionals should be different from the way you address a room full of young entrepreneurs. Everything, in fact, is different. Your topic selection, the language you use, the examples you give to illustrate points. The little bits of humor included should be tailored specifically with your target audience in mind.

Knowing your audience well—their fears, wants, and desires—is the first step towards making a PowerPoint presentation that persuades them

5. Rehearse! (Yes, Already)

It's never too early to get used to the rhythm of your presentation and take note of points you want to emphasize. While saying it out loud, you'll start to develop a "feel" for the material and notice that some things work well, while others don't and might need to be worked around.

6. Rewrite After You Rehearse

As you're rehearsing your presentation, you're bound to stumble over sections that don't quite flow naturally. Instead of reworking your delivery, it might be time to consider the content and rewriting the areas that served as stumbling blocks.

"Editing is hard. 'It's good enough,' is a phrase wannabes use. Leaders take editing seriously." - Anthony Trendl

The most important part of creating a great presentation is the writing stage. The second most important stage is *rewriting*.

7. Share With a Friend

If the stakes are high for your presentation, it's never too early to get feedback from those that you trust.

Here's an article that helps you collaborate as a team on a PowerPoint presentation. Get PowerPoint design tips from those that you trust when you collaborate.

8. Keep Your Slides Simple

This is one of the most important PowerPoint presentation tips to follow when designing your slides. Keep in mind that less is more (effective.) A cluttered slide is distracting. It causes confusion for an audience: Which part of the slide should I focus on? Should I read the slide or pay attention to the presenter?

But, a simple, visually appealing slide will engage your audience, keeping them on track with your main points.

9. Limit Words on Your Slides

Piggybacking on the last point—less is more effective. If possible, avoid bullets altogether. Otherwise minimize them to just a few simple words. The audience should be listening, not reading.

10. Use High-Quality Photos and Graphics

One of the more important tips for quality PowerPoint presentations is to use high-quality photos and graphics.

Earlier in this tutorial, you saw Envato Elements, an all-you-can-download service with PPT tips inside of templates. These pre-built designs are a beginner's best friend. They're even better when paired with Elements' unlimited library of stock photos.

People are more likely to take you seriously if your presentation is visually appealing. Users view attractive design as more usable. Similarly, they'll view a more attractive PowerPoint as more effective.

11. Use Accurate and Relevant Charts and Graphs

Charts and graphs can also be distracting if they're not used right. Make sure your information design is simple and clean so that the audience doesn't spend the entire time trying to decipher what your X-axis says.

12. Use High-Quality, Fresh Templates

Have you seen the old PowerPoint template that looks like worn paper and uses ink splashes? Yeah, so has your audience. Templates can be distracting if they're too basic or if the design feels dated. You need one with great design options.

Costs are always a concern. But when you use Envato Elements, you've got everything you need to create a great PowerPoint presentation. That's thanks to the incredible all-you-can-download subscription package.

13. Choose Appropriate Fonts

Fonts are an important part of engaging your audience. Fonts and typography choices have a subconscious effect on viewers, causing them to characterize your company's presentation and brand either positively or negatively. Make sure that you're choosing fonts that are professional and modern!

14. Choose Color Well

Like font choice, colors cause specific subconscious reactions from viewers. Choosing an outdated color combination for your presentation will render it ineffective.

15. Clean + Simple Formatting Makes All the Difference!

We've got a full tutorial on [formatting your PPT slides properly](#). Give it a read through and review the accompanying video. Just remember less is more. The focus is you and *your message*, not your slides.

16. Make Sure All Objects Are Aligned

A simple way to create a well-designed presentation is to make sure all items on a slide are intentionally aligned. To do this: hold down **Shift** + select on all the objects you want to include. Then choose **Arrange** in the options bar and apply **Alignment Type**.

17. Limit Punctuation

This isn't the place for exclamation points. Emphasize your points (while speaking). Don't enlist punctuation to do this for you. (Leave these at home!!!)

18. Avoid Over-Formatting Your Points

This PowerPoint presentation tip is simple. There's no need to have every word of every bullet point capitalized, or to have all your bullet points in title case. If possible, drop bullets altogether. Again, the simpler the better!

19. Combine Information With Graphics in PowerPoint

One of the most powerful presentation skills for PPT is using infographics. With the right type of visuals, slides come to life and reduce the text in favor of graphics.

Infographics help combine information with graphics. It's easier to explain complex ideas when you use visual formats that are intuitive.

20. I'll Say It Again - Rehearse

Just do it. Again and again. Experiment with pauses, gestures, and body language. You should practice around one hour for every minute of your speech.

21. Practice With a Timer

Consistency is key to an effective PowerPoint presentation. Timing should be similar (ideally the same) each time you rehearse. This one will especially pay off when it's time to present in front of your audience!

22. Slow It Down

Many of the best speakers today intentionally speak slowly. You'll have the chance to emphasize, appear more thoughtful, and make your information easier to digest.

23. Pause More Often

Like the prior tip. Pausing more often, allows main points to be emphasized and for information to sink in. You need to let key points breathe a little before rushing into the next section.

24. Record Yourself

Use your phone's voice recorder. Assess and critique yourself. Consider:

- Are your pauses too short or too long?
- Are you speaking slowly enough? Too slow?
- When you're nervous does your voice get high like the mice in Cinderella?

It's always weird to hear your own voice recorded; don't stress it. Use this as a time to adjust.

25. Choose Three Focal Points in the Room

If you stare at the same spot (or even creepier, the same person) the entire time, your presentation will be ineffective (and awkward.) People will be distracted by you, wondering what you're staring at.

Try this: pick three points in the room (typically: left, center, right). Take time to direct your delivery toward each physical focal point in the room. Also, focus on the center when making your primary points.

26. Vary Your Sentence Length

This makes you sound more interesting and it's easier for your audience to follow. Think short and punchy. Or go long and complex for dramatic effect.

27. Modulate!

Don't speak in monotone for your whole presentation. Be conscious to raise and lower your voice tone. Otherwise people will tune you out, and you'll come across like the teacher in Charlie Brown.

28. Practice in Front of a Mirror

What you look like is as important as how you sound. Pretend as though you're having a normal conversation and allow your hands to move with your speech—emphasizing your points. Just don't get carried away! (I'm thinking Brene Brown or President Obama, not your Aunt Jamie after a few gin and tonics.)

29. Use “Present Mode” When Rehearsing

When you finally are ready to hit the **Present** button in PowerPoint, make sure you use the **Present Mode** option. This allows for you (and only you) to view extra notes about each slide—just in case you forget something!

30. Practice With New Audiences!

If possible, try doing a few real live test runs as a webinar or even at a local Toastmasters organization to get some feedback from a live audience.

31. Engage the Audience by Asking Questions

There's no reason that a presentation should be one-sided. Why not invert the format and ask your audience a question?

To learn how to create a slide that kicks off a Q&A, use our article below. These PowerPoint design tips help you create an engaging and exciting discussion.

When the actual day arrives, there are only a few last PowerPoint presentation tips and guidelines to keep in mind:

32. Take a Deep Breath

Deep breathing is proven to relieve stress. (Source: the NHS Website) It's simple and it'll help you remain calm and in the moment as well. Even up to the last minute before starting.

33. Lighten Up Your Mood

Tell yourself a joke or watch a funny video clip. Do this before the presentation, of course. Recent research concludes that happy people were more productive. (Source: Fast Company) More productive is more focused and able to perform better.

34. Remind Yourself to Take It Slow

When we're stressed or nervous (or both), we tend to speak faster. Consciously, take yet another deep breath and remind yourself to take it slow!

35. Read the Room

Every presentation room has a temperature. It's your job as a speaker to gauge it and tailor your presentation to it.

Here's a great example. Layoffs are coming at a company, and you're asked to speak to an audience. Even if the audience isn't personally impacted by the actions, you've got to consider the overall morale of the workforce.

The *last* thing that group will want to hear is how strong the economy is and why the company is the best place to work. That doesn't mean that you've got to align to their uncertainty, but don't go too far against the grain while presenting.

Robert Kennedy III is a master of bringing energy and aligning a speech to the audience. Here's his advice for adjusting:

"It can be hard to wake up a "dead" crowd but go for it. Most of all, don't take their energy personally. Focus on serving them with every bit of your fiber then leave empty."

36. Fake It 'Til You Make It!

Go forward with confidence. If you act confident, you'll start to feel more confident. Move slowly with grace, speak clearly, smile, wear something nice. You'll appear confident to all attendees (no matter how you feel internally).

PowerPoint Presentation Tips and Tricks to Help Avoid Mistakes (What Not to Do)

Most importantly, focus on what you can do to make your presentation better. There are a few important things not to do that we've got to address. Here are a handful of PowerPoint presentation tips and tricks to help you avoid missteps.

37. Stop With the Sound Effects

Sound effects—like that swoosh that used to happen when your college professor brought up a new bullet point in PowerPoint—are distracting and outdated. In most cases avoid it.

38. Don't Use Flashy Slide Transitions

Again, this is distracting and outdated. Use transitions and subtle animations in your PowerPoint presentation. But you need to take care

39. Beware of Clip Art

This PowerPoint presentation tip shouldn't even have to be said. But please, please don't use clip art. Use professional graphics instead.

40. Don't Be Afraid to Be Afraid

The fear of public speaking is a real one. Many beginners think that if they're feeling nervous that a presentation won't go well or succeed. That might lead them to cancel the presentation.

Many of the best PowerPoint tricks don't use the app at all! Here's a tip from expert Sandra Zimmer who leads [The Self-Expression Center](#) on conquering your fears before you take stage:

"Get out of your head and into your body. I do this through a grounding exercise that really works to calm nerves and bring you present in the moment."

If you think that public speaking fears aren't normal, you might never give your award-winning presentation. Therefore, don't be afraid to be afraid and acknowledge it's part of the process!

41. Read Directly During Your PowerPoint Presentation

If you spend your entire presentation looking at the screen or your note cards, you're sure to lose your audience's attention. They'll disengage from what you're saying, and your presentation will fall flat.

Reading from your paper or screen also makes it look like you're not prepared. Many people do it, but no one should. As a general rule, you should only be presenting something you know well and have, at least mostly, memorized the main points of.

42. Don't Miss Out on PowerPoint Customizations

There's a major mistake that rookie presenters miss when they start working with PowerPoint designs like those from Envato Elements.

The best way to see how to make a good presentation PPT is to start with designs from others. That means using a template, but that doesn't mean you can't customize them!

Don't skip PowerPoint templates as you learn how to use PowerPoint effectively. Think of those templates as guides with built-in presentation design tips.

You should take care with the visuals you insert, or adding flashy effects, there are some great uses of creative ideas that you can pack your PowerPoint presentation with to be more effective

These PowerPoint tips will take you directly inside of 44. Use a Few Animations (Tastefully)

Animations in effective PowerPoint presentations are a slippery slope. We've all sat through presentations where there were so many objects in motion that it was easy to lose focus on the key ideas in the presentation.

But that's why animations get an unfairly bad reputation. Use animations to create motion and hold an audience's attention. Use them sparingly and on key elements on your slide and you'll capture that attention properly.

PowerPoint and help you level up your next PowerPoint presentation. Knowing these Microsoft PowerPoint presentation tips can build confidence in your next presentation and deliver a great showcase to your audience. Let's dive in.

43. Use the Visual Guides

When you're designing your next PowerPoint presentation, it helps to create a sense of visual rhythm. Slides that have objects appropriately aligned and centered are naturally more likely to resonate with an audience.

45. Stage Key Content With Animations

You just learned that animations should avoid being distracting, but there's an important principle to use animations properly, and it's called **staging content**.

Staging content means that the content appears step-by-step. There's nothing worse than overwhelming an audience with all of your content at once. But when you stage content, you can bring it on step-by-step.

Take it from presentation pro Suzannah Baum:

"If you're sharing a slide with lots of different points on it, using the animation to reveal those points one at a time is a way to keep the presenter's content flowing smoothly."

MICROSOFT P

46. Add a Video to Your PowerPoint

When you're sharing a big idea in your presentation, it helps to share your perspective from a few different angles. Adding a video to supplement your content can do just that. Luckily, it's easy to add and embed a YouTube video in your next PowerPoint presentation.

47. Add Charts & Graphs

Charts and graphs can help you tell stories with data. It's easy for an audience to zone out when you throw a big data table or set of statistics at them.

instead, convert those to charts and graphs.

48. Build Your Own Infographics with SmartArt

Earlier in this tutorial, we gave you one of my favorite PowerPoint design tips: *use infographic templates*.

Here's another. One of my favorite PowerPoint features is SmartArt, which allows you to build infographics right inside the app.

You don't have to use another graphic design app like Photoshop or Illustrator to add visuals. Instead, try out SmartArt to help you build graphics that are easy to update.

49. Use Presenter View

Remember that when you use the PowerPoint, *you're* the presentation. The slides are just there to reinforce what you've got to say and support your speaking points.

That's why I always recommend using **Presenter** view. More often than not, you're going to have several displays. Use **Presenter** view to show the information that's relevant to you on your private screen, with your presentation showing on the extra display.

50. Track Your PowerPoint Changes

One of my favorite PowerPoint design tips is to collaborate. Those who know you best will suggest compelling changes that are sure to help you succeed.

As you start collaborating on your presentation, it helps to keep track of proposed and included PowerPoint changes. Use the article to track changes made by
